Still Another Factory.

For some time past it has been understood that Mesers H. E. Smith and J. P. Lovett were planning to start some kind of a factory here and many vague rumors have been affoat concerning their plans. It now seems to be conclusively settled that they are to engage in the manufacture of ice, having practically arranged with the Electric Company for ample room to put in a large see plant on the lower floor of the big warebouse adjoining the basin. Mr. Smith is now in California where he will probably buy a 20-ton ice plant which will be placed in position as soon as possible. This will adu another to Oregon City's large and rapidly increasing list of factories and still there are more to come. When this city secures a new mill it is a good one and has good men back of it
