DOOR AND WINDOW FRAMES.
Cabinet Work, Fitting up Stores and Repairing of all kinds.
Jobbing Orders Promptly Executed.
PRICES THE LOWEST.
Shop corner Fourth and Water streets, back of Pope & Co's, Oregon City

ANOTHER TRIAL.

The Supreme Court Reverses the Lower Court's Decision.

WORLD'S FAIR OPENS MONDAY.

The President on Finance—World's Fair Rates—Wardner in Families.

SALEM, April 24.—In the supreme court, in the case of the state of Oregon, respondent, vs William Henderson appellant, appeal from Clackamas county, the judgement of the lower court was reversed and a new trial ordered; opinion by Bean, judge. Henderson was indicted, tried and convicted of murder in the first degree of killing Cyrus Suter by stabbing him with a pocket-knife. The evidence tended to show that the deceased and defendant had, for some two or three hours immediately prior to the homicide, been playing cards and drinking liquor in a saloon at Canby. A dispute arose over the game and Henderson had threatened to quit playing, but at Suter's solicitation continued in the game. Just previous to the killing the quarrel was renewed, when Henderson again arose and said he would not play any more. The deceased, who was much larger than Henderson got up from the table and approached and took hold of the defendant, whether in a peaceable or violent manner, witnesses were not agreed, when Henderson stabbed him with an ordinary pocket-knife. A struggle ensued, in which Suter attempted to strike Henderson with a chair, in which the fatal wound was inflicted. Judge Bean holds in his decision, as applied to the facts of this case, the instructions of the judge before whom the case was tried (Judge McBride), as to what constituted cool blood, led the jury to believe that no heat or passion on the part of defendant, short or de-thronement of reason, would reduce the crime below murder in the first degree. To constitute murder in the first degree it is necessary that a design to take life be formed and matured in cool blood and not hastily upon the occasion. It must be the result of a deliberate and premeditated act.

Ready for the Grand Opening.

CHICAGO, April 22.—Next Monday will be a great day in this city. The opening of the World's Fair which will then be thrown open to the public will mark an epoch in our history. Indications now are that everything will be ready on time.

Director-General Davis and the council of administration made a move yesterday to expedite the unloading and installation of exhibits. The director-general gave the foreign commissions permission to bring in teams and wagons to handle their exhibits independent of transportation forces at the park, and the council of administration issued an order that no charge should be made on exhibits entering the Exposition by teams owned or hired by the exhibitors. As a result the commissioners were enabled to unload cars that had been tied up in the switching yards from ten days to two weeks, and the transportation department was relieved of the demand for emergency service.

Councilor Massey made a tour of inspection about the grounds, devoting a good part of his time to manufactures hall, which has been considered the hardest problem in calculations for opening day. After he returned from his trip Mr. Massey said:

"I am very much pleased with the condition of affairs. Exhibits are pouring in from every direction and the domestic exhibitors, always the last to put in an appearance, seem to have awakened to the fact that they are due to open the show on time with their aisles swept out and their exhibits all ready for inspection by the public.

The great storm of Wednesday night showed not only how well the great structures are built, but also how admirably they are guarded. When, shortly before midnight, the sky fell in the form of oceans of water, driven by a howling hurricane, the watchers at the park were instantly abroad at the points of danger. The director-general and the director of works toiled with firemen and Columbian guards to protect exhibits and statuary from the wild weather. The struggle was severe but very successful.

The President's Views.

WASHINGTON, April 23.—To a representative of the press the president said tonight:

"The inclination on the part of the public to accept newspaper reports concerning the management of our national finances seems to justify my emphatic contradiction of the statement that that redemption of any kind of treasury notes, except in gold, has at any time been determined upon, or contemplated by the secretary

of the treasury, or any other member of the present administration. The president and his cabinet are absolutely harmonious in the determination to exercise every power conferred upon them to maintain the public credit, to keep the public faith and to preserve the parity between gold and silver and between all finance obligations of the government. While the law of 1890, forcing the purchase of a fixed amount of silver every month, provides that the secretary of the treasury, in his discretion, may redeem in either gold or silver the treasury notes given in payment of silver purchases, yet the declaration of the policy of the government, to maintain the parity between the two metals, seems so clearly to regulate this discretion as to dictate their redemption in gold. Of course, perplexity and difficulties have grown out of an unfortunate financial policy which we found in vogue, and embarrassments have arisen from ill-advised financial legislation confronting us at every turn, but with a cheerful confidence among the people and a patriotic disposition to co-operate, the threatened dangers will be averted, pending a legislative return to a better and sounder financial plan. The strong credit of the country is still unimpaired and the good sense of our people, which has never failed in the time of need, is at hand to save us from disaster."

Wardner, Idaho, in Ruins.

Spokane, Wash., April 20.—The business part of Wardner, Idaho, was burned this morning and several hundred people are homeless. The loss is estimated between \$250,000 and \$500,000. Less than one-third is covered by insurance. The fire started in Lawson's clothing store between 1 and 2 o'clock this morning. The cause is not known, as the flames had gained full control of the building before the fire was discovered. The alarm was given shortly before 2 o'clock and brought the citizens out at once, but it was too late. Before any systematic work could be done by the volunteers, the flames spread to the adjoining buildings. By 2:30, the entire population was in the streets, some fighting the flames, others rushing to save their possessions. Wind scattered the blazing cinders everywhere in a short time the whole gulch was a roaring sea of flame. It was evident by 3 o'clock that the entire business part of the city was doomed. The firemen still worked to prevent the fire from spreading, and by tearing down buildings and running great risks of being caught by falling timbers they succeeded in cutting off most of the residence part of the town, and by 4 o'clock the fire was checked. At daylight the scene was a pitiful one. The town was a heap of ruins, with ruined men and homeless women picking their way among piles of ashes. Relief committees will at once be appointed and a call for help be issued. Only a partial list of the losses can be obtained.

World's Fair Strikes.

CHICAGO, April 24.—When the carpenters employed at Jackson Park go to work tomorrow morning they will find the gates of the exposition grounds guarded by a cordon of union delegates. These delegates have strict orders to allow no union carpenter, working for the exposition company or those contractors who have not signed the agreement of the carpenters' council, to enter within the grounds. The scenes of two weeks ago are to be repeated. Not only will the union carpenters strike at the world's fair grounds, but all over the city. By order of President B. Cogswell, all union carpenters working for contractors who have not signed the agreement must quit work. This order will throw over 3000 men out of employment, to uphold the union's demand that its members shall not be compelled to labor with non-union workmen. The strike was resolved upon by a mass meeting of carpenters this afternoon. Fifteen hundred men were present, and the vote to strike was unanimous.

The Gold Reserves Broken.

New York, April 21.—The upper crust of the \$100,000,000 gold reserve has been removed. The financial world stood by and witnessed the going of it and yet tonight in this financial center no quakings of the earth are felt, and the folks who were most interested are wondering why there has been no crash of worlds nor wreck of spheres. Indeed, some financiers are looking each into the other's faces and ejaculating as to whether they have been fanatic or uncannily superstitious. The engagement of gold for export from here on the steamers sailing tomorrow and Tuesday amount to \$6,175,000 and from Boston \$750,000. There was much diversity of opinion in the financial community during the day over Secretary Carlisle's statement. In the main judgment was unfavorable, and this was to no small extent because of the statement's ambiguity.

Of late it has been a favorite superstition that if the reserve dropped below the limit the result would be disastrous, not

alone to values, but also to the mercantile community. The fact that the shock has been comparatively slight has caused an easier feeling about the future although there doubtless would not be any surprise if the movements in stocks, as well as in money and sterling exchange markets, had not been erratic for some time. Manager Sherr, of the clearing-house, said with regard to the gold situation:

"I do not think any action is necessary, as no artificial restriction that could be placed upon the export of gold would mend matters in the least nor check it. We are simply coming to a silver basis in the natural course of events and if the present mode of financing continues we will soon have no gold in the country, but will have plenty of silver."

A Pioneer Train.

New York, April 21.—The queerest train that has been seen in many a long year drew out of the Pennsylvania depot this morning amid the cheers of a big crowd of curiosity-seekers. The train consisted of engine No. 1 of the Pennsylvania railroad, and cars Nos. 3 and 5. Engine No. 1 of the Pennsylvania road is also engine No. 1 of the United States, being the first railway locomotive used on this side of the Atlantic. It started this morning to puff its way laboriously to the World's Fair, where it will be an object of wonder to millions. The engine is painted and polished so that it shines like a modern locomotive. The coaches look like stage coaches on railway wheels. They bear the inscription "John Bull Train." The train is managed by veteran railroaders. The conductor, W. T. Bailey, has been a passenger conductor since 1850. The brakemen, Jonas Hagar and Thomas Gallagher, were brakemen in 1849. The engine driver, A. S. Herbert drove the John Bull in 1852. J. W. Sanford, the fireman, was such in 1855. Car Inspector E. H. Baker who goes along, has been foreman of the Jersey City car shops since 1848. Acting Assistant Superintendent James R. Smith, who directs the running of the train, has also been a railroad man over fifty years.

It is expected that the train will carry some distinguished passengers before it reaches Chicago. The passengers this morning were all railway officials.

Bates to the World's Fair.

CHICAGO, April 20.—All work done by the Western Passenger association during the last six weeks went by the board today. All members of the association threw up their hands and gave up the hope of an immediate adjustment of the World's Fair rates. The cause of the collapse was the announcement by Passenger Traffic Manager White, of the Atchison road, that his company would at the expiration of thirty days, withdraw from membership in the association. This was done, he said, because his road could not secure protection in World's Fair rates west of Missouri river, where it does the largest business. The Atchison people say they withdrew, not with any intention of cutting rates, but simply to protect their revenue.

A World's Fair Rate.

SAN FRANCISCO, April 21.—The Santa Fe road today announced a round trip rate to Chicago for \$100, good for nine months. The fare one way, limited to a continuous trip, will be \$60. Return ticket will be the same price.

The roads west of the Missouri river are charging \$80 and the line east of the river \$20. A single trip rate will be \$60. It was first announced that only the N. P., S. P., U. P. and Santa Fe had agreed to these rates and it was subsequently stated that all the roads would put the new rates into effect May 1st. All of the local agents of the various overland roads received telegram on the subject late this afternoon.

Mrs. Hancock Dead.

New York, April 20.—After a lingering illness, Mrs. Almira Hancock, widow of Major-General Winfield S. Hancock, died this afternoon at the residence of the general's niece, Mrs. Eugene Griffin, in Gramercy park. Mrs. Hancock's strength was slowly wasting away under the subtle influence of a succession of sorrows that subdued her naturally cheerful disposition and had withdrawn her from society during the latter part of her life.

Whitelaw Beld in Portland.

Portland, Or., April 22.—Whitelaw Reil, ex-minister to France and the candidate for vice-president on the republican ticket arrived in Portland this morning in his private car from San Francisco. He is accompanied by Mrs. Reid and their two young children and D. O. Mills, the great railroad magnate and capitalist.

Almost An Even Hundred.

TACOMA, April 23.—The Union Pacific has put tickets on sale here at \$98.50 for the round trip to Chicago, good to return until November 15. General Agent Ellis said today it was quite probable that a cut would be made during the last three months of the fair.
