Council meets first Wednesday of each month in city hall.

**The way to build up Oregon City is to give Oregon City people your patronage.**

FRIDAY, MAY 26, 1893.

### GLADSTONE.

#### What do You Think of It?

A party in search of a desirable location for a home, would have to walk one-half hour from the east end of the suspension bridge in Oregon City to find a lot for \$200 and up hill at that. You can walk 30 feet and take passage on a splendidly equipped electric motor car and in six minutes for 2½¢ be landed in the handsomest suburb in the world, where you can buy a better lot for \$150, \$20, down \$10 a month.

### SPRAY OF THE FALLS.

Arbuckle's Lion or Mokaska coffee 25 cents at The Red Front.

Hamilton & Washburn are paying the highest price for grain, hay eggs, etc.

Position wanted in a family by a strong, industrious girl. Address ENTERPRISE office.

Strings and extras for guitars, violins, mandolins and banjos at Burnmeister & Andersen's.

If you want an abstract of title to your property call on Wade H. Spencer, Oregon City, Oregon.

The Park Place store leads in prices on doors, windows, shingles and all builders material.

Wednesday's sun took hold of the mud in pretty good shape and greatly diminished the quantity before night.

Rev. M. A. Dougherty will preach at the Congregational church Sunday evening on "Something About Methodism."

Died, on Thursday, May 11, 1893 at Logan, Oregon, John, son of Elder J. M. Johnston and wife, aged 29 years, 1 month and 15 days.

Now that spring has come and you can enjoy a ride on the river do not forget that Capt. Bundy has some of the finest rigged skiffs out. Prices reasonable.

Taxes should be paid on or before the 30th of this month if you would avoid costs as the county court has ordered the sheriff to make up his books after that date.

Captain Sweeney, U. S. A., San Diego, Cal., says: "Shiloh's Catarrh Remedy is the first medicine I have ever found that would do me any good." Price 50 cts. Sold by C. G. Huntley.

Now that you are thinking of building and want the very best quality of lumber delivered on short notice it will be to your interest to remember that Gladstone Saw Mill company can supply you with the best and deliver it at once.

The following named delegates were elected from Mink to attend the mass convention to be held at Oregon City, May 30: G. A. Schubel, G. Moehnke, W. D. Hill, T. W. Duffy, E. Gunther, M. Hill, and M. Moehnke.

Those who had the pleasure of listening to Rev. M. Angelo Dougherty's sermon last Sunday on Methodism were much pleased with the discourse as it furnished a large fund of information not otherwise easily obtainable. In addition to the valuable data gleaned by careful research the sermon was replete with oratorical expression.

In regard to the Merchant's Excursion to San Francisco via Oregon Pacific Railroad and steamer "Willamette Valley" the Call of that city contains a three column item giving in detail the program of the entertainments arranged for the visiting merchants among which is a banquet to be given at the Palace Hotel in that city. \$15 is the fare for the round trip.

Last Tuesday was field day with the anglers who happened to learn in time that the young chinook were taking the hook at the falls. For several days prior to that time no fish had been caught but in the afternoon of Tuesday Fred Charman, Chas. Babcock and a few others learned that the fish were again biting and they went over quite late in the day. When they returned about six o'clock Fred had nine and Charles six. They were all fine ones too. Old fishermen say that with a little higher water the sport will be immense.

On Sunday one of the new cars for the East Side Electric Railway was run over the road for a trial trip but owing to some defect in the construction an armature was burned out and it had to be repaired. On Tuesday evening the car was again run over the road in charge of T. A. W. Shock, the district engineer of the North West General Electric company, who stated that the run had proven satisfactory in every way. When the car left here it was run without stop to Milwaukie, the time required being just 24 minutes. As the distance is nine miles this was at the rate of 22½ miles per hour. The car is speeded to 30 miles per hour and can undoubtedly do much better than this. In the few minutes that the car was waiting on the switch many persons inspected its interior and uniformly agreed that it was very neat and well finished. It is from the well-known Brill car works of Philadelphia and is the neatest car on the road. Mr. Shock stated that it would shortly be placed on the Oregon City run.

That was a fortunate accident which occurred at the pulp mill on Monday, that is if any accident may be said to be fortunate. The company was building a bridge across the arm of the river adjoining the mill to support a carrier to convey the refuse from the mill to the island where it was to be burned and were making the main span over the water 124 feet long. It had been supported by a cable stretched across and in some way it loosened from the cable, probably by the wind and some of the timbers gave way, causing the chords to break and fall into the stream when the entire structure was swept over the falls. The damage in itself was not very much as it involved only the loss of the timber and work, but in another day workmen would have been out on the bridge and the result might have been attended with fatal results.

Last winter while upon a visit up the Columbia E. M. Rands found at the Cascades a fine specimen of petrified cottonwood, which he had much difficulty in getting to the train as it was as heavy as a man would care to lift. It is that part of the tree just merging into the roots and has a very pretty grain. This was left at the St. Charles hotel pending such a time as it should be found convenient to bring it to Oregon City and while in the window there it attracted the attention of the World's Fair commissioners and they persuaded Mr. Knowles, the genial proprietor of the hotel to let them have it to take back, presumably to exhibit as a sample of Oregon products.

Bids for new supplies, uniforms and equipment of the National Guard of Oregon were opened in Portland on Monday afternoon in the presence of the military board, but owing to the many styles of uniforms and equipments presented and the different forms of the bids, it was impossible to determine at that sitting what was best to be done. At an adjourned meeting held in the evening the board decided to accept the bid of the Albany Woolen mills for trousers and overcoats. As the bulk of the appropriation is to be used for these articles it is gratifying to see it placed in the state.

The call for a meeting of the citizens of this community for consideration of the propriety of holding a celebration in this city on the Fourth is a matter that should be of considerable interest to all of our people and it ought not to take a great while to settle the matter in favor of a home celebration. Hurray! for the Fourth. Let the old eagle scream in our ears again this year.

Last Saturday afternoon as H. Saerman was splitting wood on a block the handle struck the block upon which he was splitting causing the blade to slip and strike his wrist across, which it cut a severe and painful gash. Dr. Paine who was called upon in the evening to dress the wound found it necessary to take several stitches to hold the wounded edges in place.

The high water has rendered the old stairway leading to the lower O. C. T. dock useless and the company have placed steps around the south end of the warehouse to the dock and have besides blasted off the point of rocks so that teams can now drive from the upper to the lower dock thus enabling them to come and go by either Sixth or Eighth streets.

Letters have lately been received from several correspondents which bore old dates and which looked as though they might have seen considerable service in some one's pocket. It would be well for all correspondents to take pains in mailing their letters and also to get them in the office as early in the week as possible so as to insure their insertion.

James G. Scott, of Lick Mills, Cal., and G. C. Ritter of San Francisco were the guests of H. E. Smith for several days the past week. Mrs. Ritter who has been stopping here most of the winter in hopes that her health might be improved, is at present residing at Rose Farm with Miss M. D. Holmes.

The following named members of the United States grand jury have been drawn from this county to serve for the following term: J. P. Irvin, Currinsville and D. C. Richardson, Viola.

### INDUSTRIAL NOTES.

O. L. Barber of Canby has purchased lots in Gladstone and is intending to build a house thereon soon.

The lumber for H. T. Sladen's new cottage at Gladstone is being delivered and the frame will soon be in place.

One of the Dnette brothers has a very neat cottage nearly enclosed near the foot of the steps leading up to Falls View.

Lumber is on the ground for some of the sidewalks in West Gladstone and the work of grading the streets is in progress.

The new electric railway station and office building is inclosed and the inside work and finishing is being done. It already begins to show up as a very neat structure.

The Wallamette Pulp & Paper company are erecting a large platform 50 feet high on which they will place their acid tanks so as to give greater pressure than they are now able to secure.

Tuesday the company received another large barge load of sand which will be used in making concrete when they get to building the gate and side walls which they expect will be in a few days now.

The lumber for the new school house was brought up from the lower Columbia on a large skow on Tuesday by the steamer Hasselo, and the next day the contractor had Portland teams hauling it up the hill.

Work upon the West Side Scenic route is progressing as fast as the bad weather will permit. The rock work is progressing the most satisfactorily as mud does not interfere with that line of work. On Monday the bridge men were set to work at the bridges and trestles and that part of construction will now be pushed as fast as the necessary lumber can be obtained.

There is a perfect swarm of men at work below the coffer dam and above the pulp mill since the water was fully stopped the first of the week and these are busy clearing out the deposit and extraneous material so as to get a good foundation for the strong upper wall which must support the headgates. Contrary to the reported cause of the trouble in setting a tight dam, no logs were found in the way when the water was fully drawn off and the trouble lay in the pressure which washed out the material used in filling.

Since the completion of the new Foundry machine in the Crown mill they have been very busy turning out a big order of fruit paper for the California trade. One of their orders was for 150 tons, besides which they had other smaller orders enough to keep them busy on fruit paper alone for a good while to come. They intend to make their machinery turn out enough of this special kind of paper to supply the Oregon trade as well since it is beginning to assume considerable proportions with the renewed interest that is being taken in fruit raising. This paper is made on purpose for wrapping fruit and is quite similar to blotting paper which it resembles in absorption qualities. This quality causes the paper when wrapped around the fruit to absorb whatever moisture sweats out during shipment.

At the meeting of the state military board in Salem on Wednesday the contract was let for suits and equipments and the board made conditional provision for a summer encampment of part of the militia. The militia of this section consisting of the battery and nine companies of the First regiment and three of the Second will camp together near Portland, at a point yet to be selected, and \$200 has been allowed to pay the expenses of the companies from up the valley. The three Second regiment companies will probably be selected from the military at Hubbard, Albany, Eugene and Salem, by inspection the three best being chosen. All depends upon the waiving of allowances, and the acceptance of the \$300 in full for each company. The third regiment is so scattered that no effort will be made to bring together its companies this year.

Supt. Gibson has received through State Supt. McElroy notice that there is space in the Oregon school exhibit of the World's Fair for a number of photographs of school buildings. They should be about 14x16 but not less than 8x10 inches. Superintendent Gibson will forward all photographs furnished him and expects that all the schools of the county that can will furnish a well executed picture of their school building and pupils where possible as this will be one of the best ways of advertising the educational advantages of our county.

The people living in the northern part of the county and who are already acquainted with the reputation of Hon. Geo. C. Brownell as an orator will be pleased to learn that he has accepted an invitation to deliver the Decoration Day oration at Pleasant Home in Multnomah county just across the line from Clackamas. This will give those who desire to hear him at his best an excellent opportunity, as Pleasant Home is convenient of access to a large portion of the northern part of this county.

T. D. Gregory of the Rock Creek district has on account of sickness been compelled to give up his school. L. A. Read will finish the term for Mr. Gregory.

# THE LEADING GROCERY HOUSE

The Most Complete and only first class GROCERY Quality considered, our prices are always the lowest.

**MARR & ROBERTSON,**  
—Importers and dealers in—
