GLADSTONE.

### What do You Think of It!

A party in search of a desirable location for a home, would have to walk one-half hour from the east end of the suspension bridge in Oregon City to find a lot for \$200 and up hill at that. You can walk 30 feet and take passage on a splendidly equipped electric motor car and in six minutes for 25¢ be landed in the handsomest suburb in the world, where you can buy a better lot for \$150, \$20, down \$10 a month.

### A SUCCESSFUL OPERATION.

#### A Fatty Tumor Removed From Frank Kruse—Recovering Nicely.

The ENTERPRISE noted last week that Frank Kruse had been operated upon at St. Vincent hospital in having an abdominal tumor removed. From Dr. O. W. Yeargain, who was invited to assist at the operation we learn the interesting particulars of as delicate a surgical operation as is ever chronicled. All who are acquainted with Frank Kruse are aware of the fact that he was constantly becoming more and more burdened with an enlargement of the abdomen which medical skill had been unable to reduce by the administration of drugs. It remained for Dr. J. H. Rocky of Portland, who successfully used the knife in removing it to advance the idea that the swelling was merely an accumulation of fat in the form of a fold over the abdomen proper which could be removed by cutting with but little danger to the patient. Proceeding upon this theory he, with five assistants, on Thursday, operated upon the tumor with such success that 40 pounds of superfluous fat attached to the skin across the abdomen in the vicinity of the naval was removed with but little shock to the patient who took no anesthetic to deaden the pain.

An incision was made across the abdomen including a V shaped cut around the naval 26 inches across and from the outer ends of this, a cut was made in the form of a semi-circle downward including a fold of the outer skin 22 inches across and this piece with the fatty tumor attached was removed and found to weigh fully 40 pounds. The distance around the opening thus made was five feet and nine inches. The exposed edges of the opening were drawn together and stitched in place and tubes inserted at either end of the incision to draw off any drainage occurring during the healing process. Some idea of the magnitude of the undertaking may be gained from the fact that there were used in the operation forty pairs of forceps to control the hemorrhages whereas in ordinary cases but three or four pair are needed. The time required was three quarters of an hour. About half an hour after the operation was concluded there was a slight collapse of the system but from this Frank rallied nicely and by Friday night was able to eat a square meal. On Tuesday of this week his mother was down to see him and found him enjoying life as well or better than common, and to pass the time he was smoking a cigar. Dr. Rocky says that his patient is getting on nicely and he does not apprehend that there will be any return of the tumorous growth.

The Willamette Pulp & Paper company have just received their last installment of the 3,000,000 feet of spruce from the lower Columbia, but find it of such good quality for making paper that they are having some more brought up. This spruce makes the very best quality of paper and the company can start a log in at the upper mill and in fifteen hours turn out paper ready for the printing press. Were it not for the boiling required to reduce the pulp it would take less than one hour to turn a log into paper so rapid is the process employed.

On Sunday next mass at the Catholic church will be at 9:30 a. m. instead of at 10:30 a. m. as usual. The services for the day will also include the first communion for a number of the members of the school and baptism and communion for several converts. Forty hours devotion will also commence on that day and last till Tuesday morning at 10 o'clock.
