A DECISION AND PATENT.—Last Thursday Geo. C. Brownell returned from Washington, D. C. bringing with him an important document for the Portland General Electric Company in the shape of a patent to the island which was sold by the state to J. W. Draper something over a year ago and for which he held a certificate. For some time past Mr. Brownell had been working on the case as the ownership of a part of the falls by a party other than themselves might hinder the work in progress and contemplated by the electric company. This patent is in reality a decision by the secretary of the interior and is based upon a law passed last year covering just such cases as this and by its terms all the lands contiguous to and above the falls are conveyed to the company the amount being something like 26 acres. The decision is to the effect that the island sold by the state is part of one disposed of by the general government at a prior date.

THIS IN OREGON.—The Florence West gives this account of an electrical storm in western Lane county: On Wednesday evening nature gave us an electrical display that would have done credit to an eastern state. For at least five hours the flashes of lightning were blinding and the roar of thunder was at times deafening. The lurid flames played at will among buildings in town and scintillating balls rolled along the ground in a reckless and tragic-looking manner. Here and there trees were splintered, but the one shivered into a thousand pieces near the residence of Mr. Brown in the center of Florence, was the only damage the lightning did here, except the proverbial two-or-three years growth which was frightened from timid men, women and children, who clustered together in their homes and shrieked when an extraordinary deafening peal of thunder rent the air. The following morning was as clear and bright as if it were the opening of the close of one of its kind on the preceding evening.

THE OLDEST DISTRICT.—R. Scott was in the city on Tuesday and stated that the citizens of Milwaukee will lay the corner stone of their new four-roomed schoolhouse next Friday afternoon. The building is to have all modern improvements, and will cost \$9000. The laying of the corner stone will be made the occasion of quite a celebration, as the first school in this county and the first school district were established in Milwaukee. The first teacher there was Mr. Hector Campbell, and Mr. Alfred Lewelling, who was one of the pupils and married a daughter of his teacher, will deliver an address on the occasion. Mr. and Mrs. Lewelling are the only pupils of the school remaining in Milwaukee.

THE LAW IN REGARD TO TRESPASS.—For information of farmers who desire trespass notices to put on their property to keep hunters from poaching, it may be said that no such notices are now needed. No man has a right to go on another's property to shoot or fish without having obtained permission from someone entitled to give it. Every hunter when he goes on the property of another without permission knows that he is trespassing and may be arrested. This would seem to be a more sensible law than that farmers should post notices forbidding people from going where they know they have no right to go.

PROTECT YOURSELF.—Insure your property in the Guardian Assurance company of London. Cash assets \$23,000,000.

F. E. DONALDSON, Agent, Oregon City, Oregon.

SANDY BRIDGE FIRED.—The new bridge 25 miles out on the Sandy, on the Bull Run pipe line, came nearly being destroyed on Friday night. The approach was burning brightly Friday evening, when fortunately Mr. Jenkins, superintendent of the Bullen Bridge Company, happened along, and calling assistance, the blaze was extinguished after a hard fight. At a later hour the fire again broke out, but was seen in time. It required great exertion to stop it, and in a few minutes more the whole structure might have been destroyed. It is thought the bridge caught fire from a campfire carelessly left burning by an outing party.

UGLY AWNING POSTS.—Now that the Main Street improvement is fairly under way it would be a good plan to see about the inconvenient and unsightly awning posts which obstruct the streets in so many places and have them removed at the time when the new sidewalks are laid. Awning posts are a relic of the last generation and it is time that they were permitted to rust with other appliances which have lost their usefulness. It will add immensely to the appearance of the street to have these removed and as we have only the one public thoroughfare let us make the most of it.

LOCKS OBSTRUCTED.—On Monday as the workmen were engaged in bringing the big scow into the locks with a load of clay to be used in filling the cofferdam for the basin at the new power house it ran against a snag in the bottom of the river and smashed a hole in the bottom of the scow which caused it to fill with water and sink. This obstructed navigation in the locks so that the Moloc could not go up the river and the Manzanillo had to transfer its freight through the warehouse. The obstruction was removed on Tuesday so that boats could pass as usual.

SOME TALL OATS.—Edward Hughes of Beaver Creek, brought to town during the past week a sample of oats which is in all probability as tall as any ever grown. It was placed in Wilson & Cooke's show window where it was found to measure seven feet and six inches. The Walker brothers who are showing the immense fat cattle here and who are on their way to the World's Fair offered to take it with them and to show it on the way as accredited to this county and it has accordingly been sent on with the big steers.

NEW POSTAL NOTES.—An exchange notes that the new postal money orders to be provided by the government will soon be issued. In the new system there will be no complication. Sheets will be issued calling for amounts from one cent to three dollars, which can be torn up to suit the purchaser. The postmaster will have no writing to do on it, the sender simply endorsing it the same as a check or draft. One cent will pay the charges in any amounts up to three dollars, instead of three cents as now.

A LIVE CORRESPONDENT.—The Electrical World which is the oldest electrical journal published contains many interesting items concerning Oregon City and the great water power of the Willamette which is located here. These are furnished by George R. DeVore who supplies that journal with its northwest news. His living here gives this place quite an advantage in the amount of news that is supplied from Oregon City. As it is newsy and well written it is better than a standing advertisement for the place.

CHANGE OF BUSINESS.—Mrs. L. E. Sitten and Mrs. E. C. Hamilton who have for some time been conducting a millinery business on the east side of Main, between Fourth and Fifth streets have sold the same to Miss Laura Johnson who will conduct the business at the old stand. Mrs. Sitten has moved to the corner of Main where she is running a boarding house, and Mrs. Hamilton will give her attention to the selection and arrangement of fancy stocks at the Red Front.

FRANK KRUSE IMPROVING.—Word came last week that Frank Kruse had again been stricken with paralysis and it was reported that instead of improving he was gradually becoming worse. His father, Hon. John Kruse was in the city the first of the week and reported Frank getting along nicely with all traces of the last shock disappearing. He said that it was brought about by overwork on Frank's part and he did not think with proper care it was likely to recur.

SEAMEN TAKE NOTICE.—The Oregon City Transportation company will sell tickets good until September 30th to all points on North Beach via steamer Ocean Wave. Baggage checked and transferred without extra charge. This is a great convenience and will save the annoyance of looking after baggage. Buy your tickets from the agent at the Oregon City dock.

MARRIED.—At the residence of the brides sister, Mrs. J. S. Crumley at 8 o'clock, Monday evening Miss Evelyn M. Reeder was united in marriage to Mr. Lewis W. Bonser both of Sauvies, Or. T. W. Fouts officiating in the presence of a few friends.

MALARIAL AND OTHER atmospheric influences are best counteracted by keeping the blood pure and vigorous with Ayer's Sarsaparilla. A little caution in this respect may prevent serious illness at this season. Ayer's Sarsaparilla is the best all-the-year-round medicine in existence.

THE HOP SEASON.

Outlook for Growers—The Crop Promises Well—Good Prices Expected.

Report from the hop yards of this county are very favorable and indications now point to a clean hop with no vermin to trouble growers. It is still too early to begin picking, but by the 10th of September at latest pickers will be in demand and the yards will be scenes of busy activity. Buyers are at present offering to contract choice hops at 17 1/2 cents and advance 7 cents per pound. The Statesman contains the following circular: "I hope growers will take pains to have their hops thoroughly dried, as our hops are wanted in England for summer use, and they will spoil when hot weather comes if not well dried. Also, let the hops get ripe before picking, as you will gain in weight as well as quality to do so, and a London dealer told me that the best hops were those that had just begun to turn red, though he might try to get them cheaper on account of it, they were the best quality. Let the seed in the hop turn a dark color before you begin to pick. The firm have pushed Oregon hops the past season where they were never used before, and if the grower does his duty, our hops will stand as well as any raised in the world. England is going to need all the hops we can spare. As the German crop is very short, and the English crop about 30,000 bale short of last year, the English brewer will have to give very good prices for our hops. The financial depression, and the hard to mouth policy of buying adopted by the brewers, will likely have some effect in depressing the trade. The contracts that have been made will give the brewers just that many hops to use while trying to freeze out the grower, and as usual, when the grower contracts, the dealer makes the money and the growers get left."
