To Meet the Times. The subscription price for the Enterprise has been reduced to \$1.50 per year, 75 cents for six months. Cash in advance. Subscribers paying at the end of one year will not be entitled to this reduction. The low price is made to get the list on a cash basis and induce all subscribers to pay up, and especially to prevent dead beats from taking the paper and not paying for it by reason of their being law proof. Reduced price will only commence with date of renewal. This makes the Enterprise the cheapest paper in Clackamas county—eight pages all home print and full of live local news.

Trust Tariff Bill Passed.

WASHINGTON, July 3.—In the midst of intense excitement, at 10:45 tonight, after having been debated for three months and one day, the tariff bill amended to take effect August 1, 1894, passed the senate by a vote of 34 to 39. A strict party vote, except Mr. Hill, who voted with the republicans against the measure. The populists divided their strength two Messrs. Kyle and Allen, voting in favor of the bill, and two, Messrs. Pepper and Stewart, against it. At the very opening of the last day of the great struggle Mr. Harris, the veteran parliamentarian, in charge of the bill, announced that it would pass today, the third of July or there would be no Fourth of July for the senate of the United States. Until evening there were no sensational incidents. A hard but hopeless fight was made by the republicans, under the leadership of Mr. Sherman, to place wool on the dutiable list. Through the instrumentality of Mr. McLaurin (dem., Miss.) the action of the committee of the whole in exempting the salaries of United States judges from the income tax, was reversed in the senate. A very important piece of legislation, in the shape of an anti-trust law, was placed on the bill as a rider, without even so much as a division. It was designed, as Mr. Voorhees said, to insure, "intriguingly in the execution of the law," it being admitted that any tariff system afforded abundant opportunity for the formation of trusts and combines.

Minneapolis Correspondent Visits Oregon City—Interesting Comment

Anoka is a short distance, perhaps twenty miles out of Minneapolis, and is striving to make of itself a manufacturing town. In this respect it resembles Oregon City and the comments of an Anoka business man as written to the Anoka Herald will be not uninteresting to our people. He says: "I will use for one illustration Portland and Oregon City, Oregon. Both places are located on the Willamette river, the latter being situated at the falls on said river, which affords an extensive water power. It is a manufacturing town in every sense of the word, with a good farming country surrounding it—a town in every way a 'marker' for Anoka except not quite so large in population. It is also a county seat and was a distinct town by itself until connected by an electric line one year ago. Now it is called a suburb; by river it is twelve miles; by the electric line it is seventeen (fourteen) miles. I went out there yesterday to do business. The fare was twenty-five cents each way and cars left at each end of the line every forty minutes. The run, including stops takes one hour and ten minutes. Found the line was originally laid through the worst part of the valley, it being a portion where the pine trees had been partially or all burned down years ago and had never been cleared up. Now in every direction all along the line can be seen new houses and buildings and the land being cleared, in fact, all around could be seen prospering, even in these good old democratic times. Upon arrival at Oregon City I found the streets all torn up and men and teams in every direction at work laying sidewalks and paving the streets with brick, while some were at work on houses repairing as well as building new ones, etc. Then I made a tour of the principal business firms of the town and in answer to my question came the following: 'Business! Oh, it's all right. We're not over rushed, but we keep moving. No, people don't seem to go down to Portland any oftener than they did on the railroad and not any more of them; besides where they used to go down and stay all day they invariably get back to their meals. No that's all poppy-cock about going to Portland for a spool of thread. My experience is that if a woman wants to go to Portland she will find a way even if she has to walk, and besides what is detrimental in some ways by rapid transit for our town, is more than offset in others. We have people living here now and doing business in Portland. Negotiations were open for factories last summer that would never have come only for the quick communication to Portland, but the depression in money matters knocked it out for the time being only. Yes, there was quite an opposition to the line by our citizens previous to its being built, but its all over with now and the same people say its a good thing,' etc.

"So much for Oregon City and Anoka, but when it comes to compare Minneapolis with Portland, there is as much difference as day and night. Portland is a city built up by men who have not only enterprise, but carry the "doogh" in their "jeans." Ready for emergencies and ever on the alert with money to assist any business or enterprise that can make a practical or legitimate showing, and do it with a neighborly feeling of "live and let live," and in business they are a unit; whereas Minneapolis is nothing more or less than a big bag of wind, built on wind, run on wind always seeking whom they may devour, forever building air castles in the daily (papers) balloons (except the Journal which I will give credit, is as a rule a clean sheet.) About every other day there is "information from the East" that some \$450,000 soap factory or enterprise' no matter what so long as it makes a head line, "is trying to get into our city," etc., etc., but somehow these snaps never materialize. In business it is dog eat dog. When they see a man down they jump on him, and when it comes to themselves personally dividing the spoils it is who is the best man. Portland with her solid and substantial buildings and men of money, who work as a unit, with a daily paper, the Oregonian, to back them, and allow me to add, it has more good, sound, readable matter than all the Minneapolis and St. Paul papers put together, with such a magnet for drawing trade Portland is day as Minneapolis is night. Minneapolis is nothing but a big, open pasture with vacant buildings."
