Quite an interesting debate took place, and the subject, "Resolved, that over-production is the cause of our present hard times," was decided in favor of the affirmative. TWIN CITY NEWS.

Ground Hog Fable a Fake—A Splendid Band—More Improvements.

PARKPLACE AND GLADSTONE, Feb. 18.—Last Saturday evening the people gathered once more to enjoy the entertainment of the literary society. There was no debate before the house, and a talk was given on "The air we breathe and the water we drink," with chemical experiments by H. Hargreaves. The explosions of the gases were exciting especially on the part of the women and girls. After the talk and experiments, the audience was most pleasantly entertained by some of the best and most varied talent of this neighborhood.

The debate next Saturday will be, "Resolved, that the judge should be influenced by the former character of the criminal." These debates are very interesting and somewhat educational, but they might be a great deal more so, would the young men choose deeper questions—questions of the day from which could be gained a great deal more thought and education. A large list of the latest and most important questions of the day were printed in the Enterprise some time back, for the benefit of debating societies. From this list could be chosen the best of questions.

The Parkplace band continues to practice each Monday in the school house. The band boys have shown a great amount of interest in their work. They have continued with steady progress, now, for some three or four years. The boys have never yet lacked the generosity to willingly render their best services at Parkplace and Gladstone gatherings.

Mr. George Rineason is having a ten-acre tract of land cleared at Gladstone below the electric railway bridge, on the Portland road. What was not long ago, a forest of mighty firs, is now a clearing of burning stumps and cord-wood piles. Mrs. Rineason is having an eight-roomed, neatly finished dwelling erected on this same piece of property. The framework is now up and the building will soon be enclosed. Holden Hargreaves is the contractor.

The ground hog fable has proved to be a fake. This last time he came out and saw his shadow, yet we have been having the most pleasant weather these few days and we hope to see more yet.

The people of Parkplace and Gladstone enjoyed what they considered a most excellent and interesting sermon on Sunday evening, by Professor Anderson of Portland. We hope to again be able to listen to the professor's interesting words.

Mrs. Cross of Gladstone is very sick at present, but we hope and pray that she may soon regain her health.

Stafford Notes.

STAFFORD, Feb. 17.—Thus far February has been a tip-top month for doing outside work, and as an old lady once said, "rains nights and Sundays to give the hired men a chance to rest." Plowing and seeding has gone steadily on and many are getting well along with their spring work.

Several different ones are clearing and plowing new land. Biehle, Reutter and Weddle are each running break-plows, and Carl Weisenborn will commence on his this week. Jake Schatz pulled the tongue out of his wagon while on his way home from Portland Tuesday last. Not a very good advertisement for our main thoroughfare to the metropolis.

Spring wheat is once more in demand and what little there is here is being speedily bought up.

Many of the farmers see their mistake now. Last fall they could sell their clover seed for 10 and 11c, while the present prices are about 10 per cent. less. WE USE

Your correspondent had the pleasure of calling on Mr. and Mrs. E. Hammett in their new house which they have but lately moved into. It is roomy, comfortable, handy and neat, and is a credit to our country. As we entered the warm sitting-room, we were greeted by the bright colors and sweet perfumes of magnificent carnation pinks, which completely fill the bay window. Mrs. Hammett is always ahead in raising lovely flowers.

Prof. H. T. Griffith, the noted phrenologist, entertained the people of Canby last week in a royal manner. The professor is an apt talker, and at each lecture has many ideas of value and practical utility to present to those fortunate enough to hear him. Phrenology is one of the most valuable and interesting subjects that can be studied, and truly did the poet Pope recognize that fact when in his "Essay on Man" he said: "Know then thyself, presume not God to scan, the proper study of Mankind is Man."

Deafness Cannot be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be lost forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
