They were fortunate in having Emile La Forest, the crack whip of the B. C. express company, as their driver and speak in high terms of his skill, attention and courtesy. Mr. LaForest is an Oregon City boy, and though only 25 years of age, is considered to be one of the best whips in the whole country. Mr. Hobson, manager of the Horsefly mine, having informed one of the party that in all his travels through the coast mining districts he had never met his equal. On the trip, too, LaForest made Bruises, Sores, Ulcers, Salt Rheum, a record drive of 91 miles in one day and one of the most dangerous spots on the pay required. At the conclusion of the trip, La Forest was presented by the party with a testimonial and address, the latter being signed by all, including the ladies.

WATER SUPPLY SHORT,-On Sunday the city pumps will be shut off and as a consequence the supply will be short for yet has not been replaced with larger found reasonable. pipe, to connect the reservoir with the city mains, the quantity of water will be so limited that the pressure will be very light and during the middle of the day when the most water is used there may be no water at all in some of the down town mains. It will therefore behoove the people of Oregon City to lay in a supply of water Saturday evening to last them over Sunday. The reason for this stoppage of the pumps is that the Electric company is going to have the basin sluced out Sunday, it having filled with sediment to such an extent during the freshets last winter that now the water is so low that it is almost impossible for a steamboat to reach the flouring mill dock. will be stirred up as to render the water the reduction in price,

A PLAIN TALK TO WORKINGMEN.

Let us not get mixed up with complex matters in connection with the free

Let us not befog our brain with arguments about the crime of 1878 or bother with the many theories which the advocates of free silver are giving us. But let us take a common sense view

of the situation. Now, to start with:

Suppose Bryan was elected and the plead guilty and was bound over to free coinage act had been passed and that free coinage was an actual fact.

Suppose that silver could be taken to the mint and coined into silver dollars at the ratio of 16 to 1.

How would that affect us? We haven't got any silver bullion. A whole lot of people who own silver mines have it, and so they could have it coined into 16 to I dollars, but not having any ourselves we could not have a solitary, single dollar coined under the free silver act.

Now, suppose, however, that all the silver mine owners and others who had silver took it all to Washington or Phildollars, and

Suppose so much had been coined that To Hold Annual Meeting -On Mon- all the silver in the world was made

Suppose that every one of these dol-

Suppose every single one of them was worth 160 cents here and everywhere. What good would they do us unless other matters of importance to the we had something we could trade by

Well, we have something to trade;

Some have labor, so much for a dollar. Some have lumber, so much for a or coal or something else, all so much

for a dollar, We have advertising and subscrip-

tions, so much for a dollar. When we want one of those silver dollars, we cannot go and take it. They don't belong to us. They belong to the men who took the silver to the mint to be coined.

If we took one, it would be stealing. If we asked for one for nothing, it would be begging.

If the owners gave us one for nothing, it would be a gift. If we borrowed one, it would cost us

interest, and so Most of us, to get one, must trade la-

bor, lumber, sugar, coal, advertising or something to get it. This is absolutely and honestly so,

Well, being so, why do we take any chances on the dollar?

We can get gold now.

So we have supposed the silver to be,

Suppose it isn't. What then?

What is the use of taking a chance unless we can do better? A silver dol-
