Pill Clothes.

The good pill has a good coat. The pill coat serves two purposes; it protects the pill, and disguises it to the sensitive palate. Some coats are too heavy; they won't dissolve, and the pills they cover pass through the system, harmless as a bread pellet. Other coats are too light, and permit the speedy deterioration of the pill. After 30 years exposure, Ayer's Sugar Coated Pills have been found as effective as if just fresh from the laboratory. It's a good pill, with a good coat. Ask your druggist for
