"How to Teach Percentage" was the subject of an interesting talk by H. S. Gibson. He emphasized the need of the pupils understanding the four fundamental rules for arithmetic before attempting to study percentage. He should be accurate in decimal work. The subject should be introduced by analysis first; after the pupil thoroughly understands percentage, introduce other methods.

"Some Errors in Method and Discipline Made by Teachers" was the subject of an excellent address by Supt. H. G. Starkweather. He did not believe that it was absolutely necessary to have the love of pupils in order to do good work in teaching. Discipline should always be maintained. He would not discard our reading books, for complete stories. The selection in Barnes' readers are good and he believes nothing better can be arranged.
