Insurance that insures—

It is "overwork" that has filled this country with nervous dyspepsias—that takes the flesh off their bones, the vitality from their blood, and makes them feeble, emaciated and inefficient? No it is bad cooking, overeating of indigestible stuff, and other health-destroying habits.

The remedy is an artificially digested food such as the Shaker Digestive Cordial. Instead of irritating the already inflamed stomach the Cordial gives it a chance to rest by nourishing the system itself and digesting other food taken with it. So flesh and strength return. Is not the idea rational? The cordial is palatable and relieves immediately. No money risked to decide on its value. A 10 cent trial bottle does that.

Laxol is the best medicine for children. Doctors recommend it in place of Castor Oil.

The employees of the Electric hotel attended the campmeeting at New Era Saturday evening. Just before getting there the vehicle in which they were making the trip was overturned in a mud hole. ## BARLOW NEWS.

Good Crops Assured—Cottonwood Trees to be Planted.

Big Improvement.—The Willamette Pulp & Paper Co. are working twenty to twenty-five men clearing up a one hundred-acre tract of land, about two miles north of Barlow on the Pudding river, recently purchased by them from the Barlow Co. The company intends, after clearing, to plow the land and plant cotton wood trees for a future supply of timber for their large mills at Oregon City. The work is being pushed forward by their foreman, Caleb Cross, who is acting under the supervision of J. H. Walker.

FINE FLAX FIELD.—Messrs. W. B. Tull and Jerry Baty have from all reports, two acres of the finest flax ever grown in Oregon or any other state. This flax was planted May 13th in new ground of sandy loam, and its average measurement at this time is about 49 inches. According to the contract and instructions, they sowed two and one-half bushels to the acre, and those who pretend to know, claims there will be at least four and one-half tons of flax straw per acre, with measurement at maturity of about 51 inches. Thus, at the rate of \$19 per ton, which the contract provides for this length of straw, it will net them very handsomely for the small industry. The two young boys are deserving of a great deal of credit for their pluck in having made the experiment and demonstrating the fact that flax will grow in this vicinity at great profit to the grower. As the state has made an offer of \$100 premium for the best one acre of flax grown, the boys not only look to the sales of their straw, but expect to carry off the state premium.

CROPS ASSURED.—The outlook so far is for a bountiful supply of fruit, walnuts, and potatoes; and the oat and wheat crops have made a remarkable growth the last thirty days and the heads are filled with fine, plump grains. Only a fortnight ago the outlook was discouraging, but with the recent rains and the present fine growing weather, will make one of the largest yields and the finest quality of oats and wheat raised in this vicinity for many years. The farmers feel jubilant over the present prospect of receiving a fair price for their wheat, which will no doubt start at about 60 cents per bushel.

MONEY WELL EXPENDED.—Under the supervision of S. J. Ogelsby the county court has graded and is now grading the hill south of here about four miles and known as the Ogelsby hill. The cutting down of this hill has been a much needed improvement as this is the main trunk wagon road from here to Marquam and will accommodate scores of farmers living south, who seek Oregon City and railroad markets.

HOP CONTRACT.—H. J. Miller, agent for the Frank Miller company of Boston made a contract with Wm. Barlow and bought his hop crop of eight acres at ten cents per pound. The hop outlook is very promising in this vicinity, with very few lice visible.
