Men as lovers, and men as critics of women's dress are entertaining topics, when viewed from the feminine standpoint, and especially so when the writer is so clever a woman as the author of "From a Girl's Point of View," a book reviewed at length in the Argonaut of September 27th. The reviewer quotes a number of the most interesting passages and makes some amusing comments on them.

Topics Of The Day.

"The Gold Fields of the Yukon Valley" which appears in Demorest's for October, is a timely article on this subject, which is now of most absorbing interest. Authoritative statements concerning the marvelous gold deposits, together with excellent illustrations, and one of the best maps of the Klondyke region yet published, combine to render this an article of far-reaching interest and importance.

The religious world will find in the same number a valuable and strikingly interesting article, giving the story of the discovery a few months ago of an old manuscript, containing eight sayings of Our Lord, which are believed to be authentic, and certainly have a deep interest in all Christendom, if they are.

What is more attractive than a photograph of a child in a natural, playful attitude? In "How to Pose Children," in Demorest's for October, the amateur is taught the art of natural photography. This article is interesting alike to mothers and artists, and is beautifully illustrated in a manner that is an object lesson to the striver after picturesque effects. The picturesque element is also found in this magazine, in the very clever description of that most famous French cafe, "The Black Cat."

The serial "Bobbie McDuff" and the short story "A Peripatetic Hazard," of especial interest to golfers, which appear in this number, are cleverly written, and illustrated in a most sympathetic fashion. The various departments are filled with a variety of matter at once bright, useful and instructive; covering the ground from the "Care of Children," to a "Bicycle Tea." The Fashion Department with this number is one of the most complete and artistic ever published. Thirty-eight patterns are given of the latest Parisian styles for fall wear.

Pistols and Pestles.

The duelling pistol now occupies its proper place, in the museum of the collector of relics of barbarism. The pistol ought to have beside it the pestle that turned out pills like bullets, to be shot like bullets at the target of the liver. But the pestle is still in evidence, and will be, probably, until everybody has tested the virtue of
