

PATRONIZE OUR HOME INDUSTRIES

The prosperous community is the one that within itself, most supplies its own people in their various needs, and by selling much and buying little, keeps its money from going abroad.

Our farmers and manufacturers would each have a better market for their products, if our people would encourage our local manufacturers by giving preference to their products over those imported from other places. Were such the practice, it would not be long until Clackamas county would be one of the greatest industrial centers on this Coast.

WIDE TIRE BENEFITS.

They Not Only Improve the Road, but the Load is More Easily Drawn.

The beneficial effect of the wide tire on dirt roads is strikingly shown in some recent tests at the Missouri agricultural experiment station at Columbia. A clay road badly cut into ruts by the narrow tires was selected for the test as presenting conditions least favorable to the broad tire. A number of tests of the draft of the narrow tire were made in these open ruts and immediately followed by the broad tires running in the same ruts. The first run of the broad tire over the narrow tire ruts was accompanied by an increased draft, the second by a draft materially less than the original narrow tire, the third by a still greater decline, and in the fourth trip the rut was practically obliterated and filled. The narrow tires were then run over the same road, with the results that the draft was lighter than before the broad tires had been used. Alternating the broad and narrow tires on this road for a number of times resulted in a gradually decreased draft. In other words, the broad tires were improving the road surface to such an extent when run but half the time as to make the draft considerably less for all vehicles. This clearly demonstrates that if even half the wagons used on dirt roads had broad tires the results would be beneficial in draft and enormously beneficial in bettering the condition of the roads.

In another trial, when a clay road was so badly cut into ruts as to be al-

most impassable for light vehicles and pleasure carriages, after running the 6 inch tires over this road 12 times the ruts were completely filled and a first class bicycle path made. A careful record of the drafts shows that the draft was materially less than with the narrow tires immediately before. Thus the road would have been gradually improved by the use of the broad tires at the same time that the farmer would have been able to transport his products over the road with greatly reduced draft.

Steel Roadway.

Secretary Wilson has given directions to General Roy Stone, chief of the bureau of good roads at the department of agriculture, to construct a sample steel roadway at the most convenient location he can find at the Nashville exposition, where it may be seen and studied by the visitors who will attend the exposition during the summer. Secretary Wilson thinks the steel trackway for wagons is the easiest solution of the good roads problem, particularly in the west, where stone and gravel are scarce, and the soil is deep and sticky.

Improved Roads For Mississippi.

Mississippi now has a road law, which, if properly carried into effect, and if kept in effect for a material length of time, will probably give the state a system of public roads superior to any that it has ever had and perhaps superior to that of a majority of the southern states.—Mobile Register.

Going East?

IF YOU ARE,
DO NOT FORGET

Three Important Points

FIRST—Go via St. Paul because the lines to that point will afford you the very best service.

SECOND—See that the coupon beyond St. Paul reads via the Wisconsin Central because that line makes close connections with all the trans-continental lines entering the Union Depot there, and its service is first-class in every particular.

THIRD—For information, call on your neighbor and friend—the nearest ticket agent—and ask for a ticket reading via the Wisconsin Central lines, or address
