THE advancement of science is being constantly utilized in the everyday affairs of men, and every advantage apparently taken of existing conditions. Says the Journal of Medicine and Science, Portland. Me., a company has been organized to furnish chesp hot water to the poor of London, who are greatly in need of it. The method consists briefly of utilizing the waste heat of the street gas lamps. The heat is absorbed from the flames by means of a coil in which steam is generated and driven into hot water may be drawn off by placing a is thus cheap. It is proposed eventually to extend the scheme a step further. Thus by automatic machines placed close to the "hot water lamp post" the man in the street may provide himself with a cup of ten, coffee, cocoa, or even beef extract.

THE action of the Ohio legislature in returning Mr. Hanna to the senate is a compliment to the state, not so much because of the senator's superiority over many other men that might have been chosen, but because of the dirty underhanded methods adopted by dishonest and corrupt politicians to bring about his defeat. Like in the Oregon legis'ature last winter a few republicans entered into a compact with the o position to defeat the will of the people, but their treachery, unlike in Oregon, did not succeed. The election of Hanna and the failure to seat Mr. Corbett will have a tendency to forever prevent a repetition of the perfidy inaugurated at Salem one year ago. Ohio will have two republican United States senators in congress for the first time in many years.
