As there was very little regulation of the street traffic of London in those days, if the bus was filled up at starting it went like a fire engine in order to get in an extra journey, but otherwise it crawled and pottered about till the requisite number was obtained.

Each omnibus was licensed only for a particular route. It paid the stagecoach duty of £5 when first started and a shilling a year for keeping the license in force, besides a mileage duty, varying with the number of passengers it would hold, but coming to about threepence per mile on the average .-- Gentleman's worth?"

#### A Tale of the Sea

Two American captains were recently relating their experiences on different voyages. One of them told the following story: "About 1 p. m. on March 2 my ship was proceeding under full sail when a cloud about the size of a man's hand was observed on the horizon. It came on, and as it neared the ship we discovered that it was composed of locusts. They settled on the sails, and you couldn't see a bit of canvas for them. When they flew away, there was not a stitch of canvas left on the yards." "Ah," said the other captain, "I can quite believe that, for at about 3:30 p. m. on March 2 my vessel was proceeding under full sail when we observed a small cloud on the horizon. As it approached the ship we discovered that it was a cloud of locusts, and as they passed our vessel we saw that every man Jack of them had a pair of No. I canvas trousers on."-Brazil Nut.

#### Stagnation.

Stagnation is more dangerous than revolution, but sudden change means a house on sand. Action and reaction is the miserable seesaw of our child world. If these extreme men had their way, the end of the century would be plunged in blood, a universal French revolution. What we have to bear in mind is that, even in a republic, there must be a guiding hand; men of education, experience, weight and wisdom must continue to come forward. They who will not be ruled by the rudder will in the
