#### THE ROAD.

Pray, whither leads the road, fair heart?
Ray, whither leads the road?
Across a rill, around a hill,
Boside a dell where rivers start,
Where bending nut trees shed their load.
Ob, thither leads the road, dear heart,
Oh, thither leads the road!

What matter where the road may lead, So thou and I together go. Companionship is all our need, Division all our woe.

The pine tree tail on yonder hill For yours has watched the passerby. When he is dust, we shall be still Together, thou and I.

How hushed the afternoon! I dare Not whisper love, but send the thought in speechless message. All the air in silence thrall is caught.

Oh, these are God reared trees! How soft The wind dreams round their tall heads ereep!
The drowsy leaves that doze sloft
Sitr like a child in sleep.

Young autumn's fire begins to burn The brands to huri at winter's brow The sun wooed leaves sigh low and turn To crimson on the bough.

Pray, whither leads the road, fair heart? Bay, whither leads the road? Bay, whither leads the road?
Across a rill, around a hill,
bedde a dell where rivers start,
Where hending nut trees shed their load.
Oh, thither leads the road, my heart,
Oh, thither leads the road!

## Scientific Farming.

An agricultural editor of Chicago made a trip into southern California where he confidently expected to aston ish the natives with his superior knowledge of scientific and successful farming. He had stretched things considerably one evening with a view to mak ing a stronger impression, when one of the old residents, who spoke slowly and had a squint in his right eye, took charge of the conversation.

"I s'pose you hain't heerd o' my peach brandy orchi'd, mister. I reckon that's 'bout sci'ntific as anything you been tellin us 'boot. I got a certain way o' treatin them trees so that I tap 'em in th' spring, jest same's you do a maple tree, an by bottlin up th' sap fur six months I have th' fines' peach brandy you ever put down your swallow. That's kereet, an I have a neighbor as kinder lays over me in farmin. He's 'sperimented an derveloped a punkin pie punkin. He tangled up milkweed, sugar cane, eggplant, water cress an some spice plants till he got th' thing to suit th' taste, an now all you have ter do is to bile th' fruit an make your crust. He's got more boardin house orders than he kin fill in 1,000 years. Jest now I'm turnin my 'tention to th' raisin o' apple dumplin's, an I think by nex' year I kin"-

But here the agricultural editor gasped for breath and the old resident called another old resident to help get the visitor to his hotel. - Detroit Free Press.

## Soup, Savory Soup.

No up to date cook prepares the stock from which her dinner soup is made the day the soup is needed. Stock for at least a week's supply should be made at once; then the preparation of the daily dinner soup will not occupy more than 15 or 35 minutes. When consomme is served several times in the week, the entire amount used is made at once, and the different garnishes are added the day it is served. It is the same with sauces, and by a little calculation a good manager can easily discover about what proportion of each sauce is necessary for a month's supply. This once prepared, the table is revolutionized so that the sameness that characterizes the plain roast and broiled meats is no longer known. A new sauce each day gives an entirely different flavor to the meats and vegetables. - New York Tribune.

New York has a shop in which Bibles and rum are sold side by side. The place is at the foot of Washington street. not far from the Syrian colony, and its patrons include Syrians, Armenians, Turks, Russians and Irish longshoremen. The Bibles, together with other books of a religious character, are kept in a case at the end of the bar.

#### FALSE TEETH TRADE.

A REGULAR BUSINESS IN BUYING AND SELLING THEM.

Sometimes the Discarded Sets Are Cleans ed, Brightened Up and Resold, and Sometimes They Are Broken Up For the Old Gold In Them.

"Old False Teeth Bought."

This is the sign which attracts the attention of visitors to the office of a certain dealer in dental and optical supplies who does business in Chicago.

"It's queer how people are attracted by that sign," said the owner of the establishment. "I never intended it to be prominent, because there are other lines in my business I am more interested in pushing, but it seems to fairly force itself into the minds of everybody who comes here, no matter what his mission may be, and 'old false teeth bought' is the only thing they can think or talk about.

"There's nothing audacious in dealing in secondhand false teeth, although I will admit the sign is an unusual one. It is a legitimate branch of our trade With ordinary usage false teeth don't wear out and are just as good at the end of a few years as they were when new. The teeth themselves are valuable, and the gold work ased in binding even the commonplace kind together is costly. People are forever getting new ideas about their teeth and keep the deutists busy changing or building over their artificial molars. Then, you remember that a whole lot of people who wear

"Ten years ago there was no way of utilizing this old material. It was all dead waste, so to speak. But now it is different, and people are more econom ical. False teeth, especially if heavily set with gold plates, are worth too much money to be cast aside when new ones Thus it comes that a trade of consider able proportions has sprung up in this The conductor as the girl got aboard line, and old false teeth are a staple in

"Who brings them here to sell and what class of customers buy them?"

"Small dentists who are bard up financially and lack the inclination or facilities to clean up and build over the discarded sets, which they are sharp enough to retain from their patrons, are the main source of supply. Sometimes they make their patrons a little allowance for the old sets of teeth, but they plea that they are worthless. Then we

"Why, one woman came in here yesterday to buy an opera glass. She looking some high priced glasses when I The woman passengers murmured to stopped to wait upon a man who frefor them, and then, noticing probably his somber clothes and an end of black crape sticking out of one of his side pockets, she flounced away in a fury without a word of explanation. It is hard to please everybody, and as times are hard I have to be very careful."

"But what about your sales? Who

from you?" "Principally a class of men who make a business of working over the good shape, it is given a thorough cleansing, brightened up, and then resold to deutists who have a cheap patronage. A little tinkering will make them fit after a fashion in the mouths of people who want to make a show of false teeth at small cost. Where the sets they are broken up, the gold either and the teeth themselves remounted as they are needed for patients. It's a good thing for poor people, for many of them are thus enabled to get passably fair false teeth at a nominal price, when otherwise they would have to go without, owing to the great expense. Excuse

me while I wait upon this woman." When The Inter Ocean man left the establishment, the merchant was dickering with an ample proportioned African "aunty" for a double set of teeth with heavy gold plates, which she said she had found in a hotel where she worked as chambermaid.

"Der genman' don' go to 'at 'orspital," said aunty. "E's wuz so sick when dey tak' 'im way be don' clar forgot 'is teet', an I doan' 'spec' he'll wan' 'em any more. Steal 'em? No, sah; no, sah! Hoss, 'e say 'tak' ole truck 'way. I doan' want 'em 'round 'ere.' Ole truck-umph, umph-why, dat's jes' like findin five dollabs."-Chicago Inter Ocean.

## To Suppress Sweating.

A large number of the best women of Syracuse, those identified with clubs and those not so organized, have united in a movement to suppress the sweating system, so far as it exists in Syracuse. A consumers' league has been formed and co-operation with the trades assembly is hoped for. The movement originated with the Political Equality club and was speedily indorsed by the Household Economic association, and from this social circles of Syracuse. The league is and Philadelphia organizations.

## Splendid Crystals In California.

Some time ago John E. Burton of Lake Geneva, Wis., leased the right to prospect for crystals in the old Green Mountain mine, near Mokelumne hill, in Calaveras county, Cal. He found a number of fine specimens, and ope of them is claimed to be the largest group takes these old grinders and incisors or mass of crystals ever found. As taken out from the drift where it was uncovered it was 11 feet 7 inches in circumference. It was 4 feet 2 inches long, 3 sets. When the outfit is in reasonably feet 6 inches wide and 8 feet 2 inches high. It weighed 2,200 pounds. The mass included one large central crystal and a surrounding group of smaller ones. From the central one it was estimated that a perfect sphere 14 inches in diameter could be cut, while several others from three to eight inches in are not good enough to be used entire diameter could be obtained from the mass. Mr. Burton has found in all melted down or saved to be remodeled, about 12 tons of crystals.-Eugineering and Mining Journal.

## She Didn't Say Nay.

"Yes," said the summer girl to be as she held up two shortened skirts, one of duck, "all our gowns for exercise are short, ending at what would be our shoe tops if we wore high boots, but we shall wear low shoes. I don't know," she said shyly, "whether we think we have nice ankles or if we wish to show our stockings, which are gayer this season than ever." "Both," I ventured, and she didn't say nay. - Pittsburg Dispatch.

Watts-This is the most honest town, think, on the continent. The conductor missed me this morning, and everybody in the car looked as if they were angry because I did not pay.

Potts-They were not angry because you hadn't paid, but because they had. -Indianapolis Journal.

## currer or vines.

An all important matter in growing vines is to see that they are constantly supplied with sufficient water. Planted as they usually are, in a situation where they are exposed to the sun a major portion of the day, the soil dries ont very rapidly, and plenty of water should be given when necessary. In the event of red spiders attacking the foliage of the tender sorts of annuals, a daily syringing will quickly eradicate the pests. To induce a low, bushy start has spread through many club and growth in annuals, cut the tips of the runners. Hardy vines, such as wistariformed on the lines of the New York as, honeysuckles, etc., when not growing too rapidly, can be trimmed with little or no injury .- Woman's Home Companion.
