State News.

The salmon pack is small, only about 300,000 cases. Fire at Dayton burned the warehouse and 40,000 bushels of wheat. The Mazama's box is missing from Mt. Hood so T. H. Gardner reports.

In a gambling row at La Grande one Chinaman shoots and kills another. The salmon packers are endeavoring to get the season extended to Sept 1st.

A North Dakota colony of 30 families will settle near Forest Grove, this fall. The Oregon State Teachers' Association met at Newport, on Wednesday, July 27.

Mines around Canyon City are still attracting attention, both locally and from eastern capitalists. The annual meeting of the Southern Oregon Pioneer Association will be held at Jacksonville, Sept 1.

The second largest cargo of flour ever shipped to the Orient left Portland Tuesday on the Mogul, 45,999 lbs. Threshing is now well under way near Eugene. The yield of wheat, so far as reported, is from 18 to 30 bushels per acre. Most of the farmers counted on a better yield than this.

The annual school fund apportionment made this week by Treasurer Metschan was based on 130,753 children of school age. This shows an increase of 37,653 in the past ten years. John Walker, who resides near Athena, Or., was severely injured while threshing. His hand was caught in the cylinder of the machine and lacerated so badly that amputation of portions of it was necessary.

Governor Lord is seriously considering the advisability of calling a special session of the legislature this fall. He thinks the regular session of 40 days, with a United States senator and state commissions to elect, is too short in which to attend to the necessary law-making.

The stockholders of the Newberg Fair Association did not intend to hold a fair this year, but as there seems to be a demand for one, they have submitted a proposition to Newberg citizens. A guarantee of \$150 is desired, \$100 to be used toward paying expenses and \$50 for premiums. It is thought the guarantee will be raised.

A serious accident happened to John C. Barnes, of Gervais, last week. He was opening the gate into his barnyard, when his four-horse team ran away. He jumped on the brakelock, and in passing an apple tree he was caught between the wagon and tree and severely crushed. He is painfully bruised and will be confined to his home for some time.

Tuesday afternoon, Jacob Doerner, a farmer living near Cleveland, Douglas county, left Roseburg with two horses, riding one and leading the other. The horse he rode reached home Wednesday. On Mr. Doerner not putting in appearance, search was instituted. The missing horse was found in the river, drowned. It is supposed Mr. Doerner went into the river after the horses and became entangled in a rope and was drowned. His body has not yet been recovered.

The work of cutting and binding full grain will be about completed in Benton county by the first of next week. Most of the threshers in the county will begin operations by Wednesday or Thursday. So far as can be learned, the yield will be above the average per acre. The acreage in cultivation is exceptionally large. Wheat is quoted in the local market at 52 cents. The past three days have been noted for extreme heat. The maximum temperature at the agricultural college was 99 degrees in the shade yesterday.

At St. Mary's hospital, in Walla Walla, last week, Dr. N. G. Blalock performed a remarkable surgical operation. Miss Carrie Stone, of Athena, Or., who had for some time suffered from stomach trouble, her death being but a question of a short time, was taken to the hospital to be operated upon as a last resort. Dr. Blalock and his assistant removed from her stomach a large mass of black hair, or a dermoid cyst growth. It measured 32 inches in length, 5 inches in diameter, and weighed six pounds. Miss Stone has a good chance of recovery.

Hon. John Minto, of Salem, is spending his whole time experimenting with hop sprays. He stated today that he intended to continue his experiments until he had found a composition that would bring certain death to hop lice, and until he could tell the farmers exactly how to prepare the mixture in the cheapest and best manner. His method of testing sprays is to make the mixture very strong, so strong that he meets immediate results, and then by gradually weakening it he finds what proportion of ingredients will secure satisfactory results, with the least possible expense. Mr. Minto says the farmers are too ready to give up spraying if their spray does not kill the lice when used in the prescribed proportions.

Acker's English Remedy will stop a Cough at any time, and will cure the worst cold in twelve hours, or money refunded. 25c. and 50c.
