THE MODERN ENGLISHMAN. An Incident Which Aprily Illustrates His Deliberateness.

To illustrate the deliberateness of the modern Englishman let me tell of a hat which blew off a mechanic's head on the top of a bus crossing Albert bridge. A stiff breeze blew up the Thames, and the hat was whirled against the side of the bridge and then went spinning down the footway in the opposite direction from that which the omnibus pursued. "I say," said the mechanic, reaching over and touching the driver on the shoulder; "me 'at's blowed off." The driver fidgeted a moment at this sudden interruption, then took a tighter grasp of the reins and clucked to the horses to quicken their pace. The hat and the vehicle spun along in opposite ways. "I say, driver," said the mechanic; "me 'at's blowed off." The driver fidgeted again, but now his mind grasped the situation, though most unwill-

"It 'as, 'as it?" he said, turning to the man. "Well, then, that'll teach you to buy 'ats to fit your 'end. I 'ad a ole lot of 'ats blow off before I made up me mind to get 'em to fit me 'ead. After that I 'ad no more trouble."

The hat was still bowling along and was now at the farther end of the bridge. The mechanic looked at it dully. I was in a fever of gratuitous impatience for the bus to stop or for the man to climb down. The driver The treasure box on the steamship turned back to his work and clucked to his horses, who quickened their gait. Just then a vagrant stopped the flight of the hat and ran and caught the bus and got a penny for his pains. So every one was happy, even L-Julian Ralph in Harper's Magazine.

Payn's Fearful Writing.

James Payn's chirography is something fearful to contemplate. It is simply execrable. The Academy tells a nice story about Payn's "bewildering handwriting." Miss Jane Barlow sent a poem as a first contribution to The Cornhill when Payn was its editor. Think of the lady receiving a brief line which she interpreted as follows: "I have no use for silly verses.

Of course Miss Barlow indulged in copious tears. There never was such an ill mannered snub. Then she commenced to study the scrawl. Now came a gleam of light, for she dimly made out what it really was. "I hope to use your pretty verses.

Alas, when you are, as a poet, "declined with thanks," there is today no possibility of error, for the fatal missive is always typewritten.

OREGON OREGON CITY,

THE BALKY HORSE.

A Simple Scheme of the Motorman That Made Him Go.

People near the New York entrance of the bridge saw a balky horse frustrated with delightful case the other day by a man who openly confessed that he had no practical or theoretical knowledge of horsemanship. He was the motorman of a Fourth avenue car bound toward the terminal at the bridge. The horse was one of those angular, cockeyed, ungainly beasts that |} no amount of currying and feeding could make respectable.

It had stopped square in the middle of the track and had spread its feet spart as though its mind was made up to hold the street against the world. In s few minutes four trolley cars were backed up behind the cart and more were in sight down Center street. Motormen, conductors, truck drivers, assorted citizens and a policeman stood ground and gave the usual advice. The driver kicked the horse and two or three men called to the policeman to stop him. Then they in turn made humane suggestions about starting a fire under the beast's stomach. A woman said that it would be easy enough for any one to coax him along with a lump of sugar.

The motorman of the fifth trolley car, which had by this time reached the end of the blocked line, walked up and surveyed the situation.

'Whose car is this?" he asked, pointing to the first car that had come up behind the wagon to which the balky horse was attached.

"It's mine," said another motorman, who was fingering a brass motor handle as though he would like to brain the horse with it. The motorman from the rear hoisted

the car's front fender and strapped it in place, folded against the dashboard. "Now," he said to the motorman very easy." Then, turning to the disconsolately profune driver of the horse, he said, "Get up and take hold of the

reins. The car ran forward until the fender reached the tailboard of the wagon. "Now," said the self appointed master of ceremonies to his fellow motorman, "start up as fast as you durn please. and don't stop until you get to the

A Real Bottomless Prt.

Few indeed are they who have penetrated to the innermost recesses of Willis' cave-to the great rotunda where the icy water of the "big spring" takes a leap into the midnight blackness of the "bottomless pit." The entrance to the cave is at the summit of a hill near Versailles, Ind.

Rider Haggard, in his imaginary pictures of underground horrors, has told nothing that would equal the true story which a single misstep would furnish in Willis' cave. A stream of water pours from the rock, and, pursuing a devious underground channel for a quarter of a mile, emerges into a vast chamber with a slanting, slippery floor inclining to a sink hole in the center. Down this hole the stream pours and is lost forever. By means of ropes and weights the sink hole has been sounded to a depth of 400 feet, and still the bottom has not been reached. The room is surrounded by a narrow ledge of rock, on which daring explorers have made a complete circuit. One step off the ledge upon the slippery floor would mean almost instant death in the bottomless pit
