A prominent and successful Clackamas county farmer in conversation with an Enterprise man Monday expressed himself quite strongly against a practice which has been followed quite extensively in this county this season, and for that matter in all seasons more or less. Potatoes was the especial subject of his discourse and he says that he knows of many a farmer, who because potatoes were a good price sorted out the best ones for market, keeping the poor ones for eating and for seed. Of course it was all right to keep the little ones for eating, but for planting, he said a glance at many of the potato fields would show that a grievous mistake had been made. Good seed is necessary for good results and poor weak seed can hardly be expected to beget anything but a correspondingly poor crop.
