A Fowl That Won a Battle.

A singular story is told of a gallant cock whose moral influence at a critical moment during the battle of St. Vincent helped to save a British man-of-war from the hands of the enemy. The fowl in question formed part of the live stock of the Marlborough, a vessel which had suffered so severely that her captain was considering the advisability of striking his flag. The ship was entirely dismasted, while the chief officers had been carried below severely wounded, and the crew, without anybody to cheer them up, were beginning to grow sullen under the heavy fire of the enemy, to which they were hardly able to respond.

At this emergency a shot struck the coop in which the fowls were confined. The only surviving occupant, a cock, finding himself at liberty, fluttered up and perched himself on the stump of the mainmast and surveyed the scene of carnage around him. Then, flapping his wings in defiance, he began to crow vociferously. He was answered by three hearty and exhilarating cheers from the crew, who all had a good laugh, and, with spirits thus renewed, continued the action with a vigor that lasted until a turn in the battle rescued them from their tight position.—Washington Star.

Gastronomic Anarchy.

They say the art of cooking is dying out in France. Cooks and public agree in this, but they charge each other with the cause.

"The French public is degenerate," say the cooks. "It no longer knows a good sauce from a bad one."

"Qu'est-ce que vous voulez?" retorts the public. "The cooks may still be artists, but they are no longer cooks."

"If you want the matter demonstrated," says a Parisian who may be considered to represent the public, "look at the so called culinary exhibitions given in Paris every year. These exhibitions do not ask the judgment of the palate. They ask the judgment of the eye. They ask you to criticise Swiss chalets made in butter and Louis XV furniture made in cake. They wish to imitate the saxon, and they show hard sculpture sentimentally disposed in palm bowers and canopies, with foregrounds of strag beans, and sunsets of tomato catchup. It is the last word in impressionism. If you like, but it is not cookery—it is anarchy.—Sketch.

My wife has been using Chamberlain's Pain Balm, with good results, for a lame shoulder that has pained her continually for nine years.
