He is having an outline draft of the S. P. road, the central line road, the Molalla road, and the Canby road prepared for practical use.

The Water Commission is determined upon action, but in just what direction they are still undecided, to supply the city with better water. Commissioner T. L. Charman states the Board is not unmindful of the condition of the water at present, and that they are working indefatigably upon some plan of relief. He also states that the south fork of the Clackamas has been explored and it is found that the nearest place where water by gravitation could be supplied, would be 21 miles distant from the city. Gravitation from Gard springs is possible but the water supply is short. The nearest place where gravel filter could be arranged, by filling a large well, supplied by small sub-wells which are fed by numerous pipes, the water in which has first flown through gravel, and thence pumped to the city, is four miles. It is the intention of the Board to make a practical survey of the situation as soon as the weather is permissible.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portions of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & CO. Toledo, O.
