Since my last to your paper the wheat crop has made a fine change for the better. The green aphids that were on the wheat a month ago have disappeared and there is every indication at present of a good average crop. Winter oats look well and are almost ready to cut. Spring oats need more rain. Peas, potatoes and other vegetables are doing well. Apples and pears will be plentiful this season in this vicinity. Your correspondent visited the hopyard of Geo. Randall & Son and we found the hops looking very fine and every prospect of abundant yield, with a fine chance of pickers making money. Haying is over and barns are full of an excellent quality of feed, although the weather has been very threatening. No one was so unfortunate as to be injured by rain. Clackamas county is surely not so slow that the powers above have to threaten them with rain to compel them to rustle. If such be the case, what would be needed to get a move on the rest of the world?

Children's day was at last observed here and a good one too. It seemed only to awaken the hearts of the little ones to have their day postponed, and each one tried to do their best, and did, until it would be an injustice to mention any one or a dozen, for all were good and all it requires to be assured of the fact is to visit us some Children's day in the future and see.
