MISTAKES FROM THE TELEGRAM.

It would be amusing, were it not ridiculous to see the Portland Telegram size up public men who have made reputations in National affairs that are enviable and who never have heard and probably never will know, that the Telegram exists.

Allying to Senator Dolliver's neighborly mention of Governor Shaw, both of Iowa, for president, the Kansas City Star remarks: "Iowa has had some brilliant statesman." But it mentions no names, except, in a side remark, that of Allison.

The brainiest men Iowa has thrown into public service or notice for a generation is Justice Harlan; and he being on the Supreme bench is out of politics—unless the democrats follow Bryan's suggestion and make a presidential candidate out of him.

Iowa has good men in the public service, no doubt, all good machine party men; but as to "brilliant statesmen"—that must have been sarcasm.

Allison, Dolliver and Shaw are too well-known to require a defence. Their names are familiar in nearly every household. But it is on Gear and Harlan that the Portland paper falls down hard.

The Telegram says that Gear was picked up for a railroad attorney and then put into politics by his railroad company. This is miles away from the truth.

A FOUL CRIME.

When word was received last Friday that the president was assassinated it was at first received with incredulity. People could not at first realize that the chief executive had been the victim of a foul anarchist. When the people came to a full realization of the crime it affected them the same as it would if the victim had been a dear friend or relative.

While gloom pervaded the American people a week ago today it is believed the president is practically out of danger.

Tax county board has made an order limiting the deputies employed by the county officers. Under this order the clerk will have one deputy, the sheriff one and the assessor two.

OREGON CENSUS FIGURES

School, Militia and Voting Population in the State in 1900.

The Census Office has given out a bulletin showing the school, militia and voting population of Oregon in 1900. Out of 132,887 persons of school age, 5 to 20, 67,669 are males and 65,218 females.

There 105,628 males of military age, 18 to 44, 80,802 being native born and 27,608 foreign born. The total white militia population comprises 50,595 of native parentage and 18,542 of foreign parentage, and 18,290 foreign born, while the colored contingent numbers 9201.

Improvements on the building are nearing completion and the association will soon open its doors for business. The opening session will be a religious meeting for men only on Sunday, Sept. 22nd, at 3:30 p. m.

The public reading room will be free to all, and papers from all over the Pacific Northwest will be kept on hand. The parlor and reading room for members will be supplied with popular, up-to-date magazines, a library with books of reference and literature.

Seven hot and cold showers and one tub constitute the bathing facilities. The dressing room has been enlarged and large, commodious lockers will be added. Bible classes and Sunday afternoon religious meetings will be regular features of the work, and it is hoped that the association will be an instrument in God's

Farms and Farming.

Crop Bulletin.

Light rains fell during the week in nearly all the parts of the state. They were very beneficial to late crops and pastures, but not heavy enough to injure grain exposed in the fields or to damage hops.

Threshing was delayed somewhat by the rains. The returns this week are as follows: Washington county, wheat 15 to 30 bushels to the acre, oats 30 to 40; Polk, wheat 28, oats 35; Marion, wheat 20, to 30, oats 30 to 40, barley 30 to 40, clover 1 1/2 to 4; Linn, wheat 10 to 50, oats 20 to 100; Josephine, wheat 10, oats 25; Jackson, wheat 10 to 16; Union, 20 to 35, oats 20 to 45.

Hopping is now well started. The crop promises to be of superior quality, but slightly below the average in quantity. Late potatoes have been benefited by the rains, but they were not heavy enough for the crop, and unless more rain comes very soon the yields will be considerably less than usual.

Oregon's hop crop will be about 65,000 bales. Last year it was 83,000 bales. The quality this season will be the best. The prune driers have begun work in Southern Oregon, and Petite prunes are being picked in some sections in the Willamette valley.

HORSE TALK.

Clip your horses as the hair begins to shed. In this way you get rid of the flying hairs, and it is beneficial to the horse; you can get the skin thoroughly clean.

After clipping, which must be done in a warm place, scrub him with soap and water, a little place at a time, and rub dry, then blanket warmly, and a horse will seldom take cold; never if properly cared for.

Never leave mud on the legs of horses, whether they are clipped or not. The mud closes the pores of the skin and checks the insensible perspiration, and in a very little time you will have a case of mud poisoning or scratches, which may be difficult to cure.

The mud may be allowed to dry and then be cleaned off and out of the hair thoroughly, but should never be left on all night. An old broom, cut off so it is stiff and stubby, is good to take off the thickest, and finish up with a whisk of straw or a coarse cloth.

This keeps up a healthy circulation in the legs and makes them better and stronger. The rain which followed the warm weather will be very beneficial to the potatoes that were planted late; but if it should continue wet for any length of time those that were planted early and had almost reached maturity on account of the dryness will be a very knotty lot of potatoes.

A rainy week terminated last night in a heavy frost at LaGrande. The only crop subject to much damage was potatoes, and they are practically matured.

Mr. Editor—Allow me to speak a few words in favor of Chamberlain's Cough Remedy. I suffered for three years with the bronchitis and could not sleep at nights.

Extensive equipment for the gymnasium has been ordered and is now on the way, so that Oregon City Y. M. C. A. will not be behind other associations of its rank for physical training.

Seven hot and cold showers and one tub constitute the bathing facilities. The dressing room has been enlarged and large, commodious lockers will be added. Bible classes and Sunday afternoon religious meetings will be regular features of the work, and it is hoped that the association will be an instrument in God's

should have continued wet weather for a while it will not be the first time that potatoes have made the second growth in Oregon.—Pacific Farmer.

It is estimated that there are now about 23,500 hoppers at work in the hopfields of Oregon. In addition to these, there are men working in kilns, hauling hops in the fields, and doing other work around the yards, in numbers sufficient to increase the total number of persons engaged in the hop-harvesting to 25,000.

Prices are fair, as they will undoubtedly be if growers keep their nerve, the owners of the hopyards will net a good profit after paying out this large sum to their pickers, and after paying the expenses of cultivating, training and spraying their hops.

This computation is based upon the assumption that the Oregon crop will amount to 80,000 bales of 185 pounds each, selling at a trifle better than 10 cents. There are many who say the crop will not make over 70,000 bales, and the appearance of the vines seems to confirm this estimate.

Practically all the yards will be running with a full force of pickers by tomorrow night, and some have had full force at work since Monday morning. The heavy rain early in the week settled the dust, cooled the air, washed the hops, and left the yards in perfect condition for good work.

Koot Crops Need Rain.

Reports from Clarkes, this county, says that threshing is still in progress. The weather has been cloudy. All root crops need rain and will be short crops unless relief comes soon.

The picking and shipping of peaches in the Ashland district is at its height, and the shipment from the warehouse of the Fruit Association now amount to over a carload each day.

The rush at the drug store still continues and daily scores of people call for a bottle of Kemp's Balsam for the Throat and Lungs for the Throat and Lungs for the cure of Coughs, Colds, Asthma, Bronchitis and Consumption.

There is nothing that will arouse the ire of a young man or woman so quick as to have inferior laundry work put off on them. They may dress ever so well, but if their shirt front or shirt waist is mussed their neat appearance is spoiled.
