MEMORIAL

As a Tribute of Respect to Our Martyred President.

SPECIAL MUSIC IN THE CHURCHES

Presbyterian, Baptist, Congregationa and Methodist Churches Hold Solema Services.

dent McKinley were held last Sunday in beld on the matter. three Oregon City churches, In the morning Rev. A. J. Montgomery, pastor of the Presbyterian church, presched a ident, and took for his text "Let Me Die the Death of the Righteous and Lat My Last End Be Like His," Special music was rendered.

At the Congregational church Sunday evening the Baptists and Congregationallsts united and joint choirs rendered excellent music. Pictures of our martyred presidents, Lincoln, Garfield and McKinley, adorned the altar. Rev. J. language leave no doubt upon the point. H. Beaven delivered the principal adacter of the Man." Miss Mary Conyers sang "Come Unto Me," and Rev. E. S. Bollinger spoke on "Our continuous Duty."

known speakers, Hon. C. B. Moores and intimate connection. State Senator Geo. C. Brownell. The It may be asked how fresh manna interior of the edifice was draped in Hebens arise, seeing that it is difficult mourning, with flags and the president's to imagine a frequent coincident meetpicture. Meade Post, No. 2, Grand Army of the Republic, and Meade Reliet Corps attended in a body. The service opened with the rendition of one of President | At certain times in the year a yellow-"Lead, Kindly Light," Mrs. Clark Ganong sang "I Love to Hear the Savior's Voice," which was admirably suited to the pathos of her voice.

Hon. C. B. Moores contrasted the attipresidential campaign. Mr. Moores said: "Today those who have been the most Thus, then, Lecanora esculenta which we so earnestly differ are largely The coarse and brutal attacks made by journalists and platform speakers upon our public men, professedly made in the McKinley's death there was a lesson for own. hundred thousand sermons, influences voiced in enlogies from the press, the platform and the pulpit that will leave be, for immense distances. their impress upon the nations for generations yet to come."

Your Heart Be Troubled," and Hon. Geo. C. Brownell made an impressive address, touching on the president's record as a soldier and of his love for the Grand Army of the Republic. He spoke of our form of government, showing what erto it had been practically unknown .it cost to establish it, what sacrifices were made and the blood that was shed to make the country free. He said that anarchy was an enemy to all progress and should be stamped out. Mr. Brownell made a forcible presentation of the results of President McKinley's administration in the Philippines and in Cuba and was glad that the president had lived to see our country united. The speaker said that the Christian side of the president's character and his loving devotion to his invalid wife was an example to all

GRAIN-01 GRAIN-01

Remember that name when you want a delicious, appetizing, nourishing food would flourish a great deal better if drink to take the place of coffee. Sold by all process and liked by all process and liked by all who have by all grocers and liked by all who have used it. Grain-O is made of pure grain, it aids digestion and strengthens the as the adults can drink it with great benefit. Costs about 1/4 as much as coffee, 15c and 25c per package. Ask your grocer for Grain-O.

The Enterprise \$1.50 per year.

SHOWERS OF MANNA.

SERVICES JUST WHY AND HOW SUCH PHE-NOMENA ARE POSSIBLE.

> This Food of the People of Israel In the Wilderness la an Edible Lichen That Is Still Found In Parts of Asta and Africa.

"It is manna?" exclaimed the people of Israel as they gathered the food which seemed so miraculously to appear at their very feet in answer to their cry for sustenance, but though they are and were satisfied, we are told they "wist not what it was."

And during the ages that have passed since its first appearance on that memorable dewy morning in the wilderness of sin men have declared again and again that they "wist not what it was" that thus fed the Israelites in their need, though numberless conjec-Religious services in memory of Presi- tures have been made and discussions

The chief opinion which had sway for a long time was that manns was the sap of the tamarisk, but now authorities, seeing in the light of widensermon on the pathetic death of the pres- ing scientific knowledge, declare that manna was without doubt a certain lichen (Lecanora esculenta).

This is borne out by the fact that well anthenticated rains of manns, absolutely believed by the inhabitants to be showers from heaven, have been reported at least six times during the past century by reliable travelers in the east, and the descriptions of the deposit given in precise present day

If a piece of manna be examined dress, taking for his subject "The Char- under the microscope, its peculiar compound structure can be clearly seen. There is a deliente network of interlacing fungal threads glistening in the light, while inclosed in their meshes are a number of round, bright green The services of the Methodist church cells; each a tiny aigal plant. Impertinent.

It is said that Sarah, duchess of Marlborough, one day remarked to her grandson, Jack Spencer: "Jack, you must marry, and I will give you a list of the ladies you may propose to."
"Very well, granule," he said, and he

proposed to the first on the list. When he came back with his wife from their wedding tour, they went to pay their respects to the old lady.

"Well, now," she said, "I am the root, and you are only the branches, and therefore you must always pay me a great deal of deference."

"That is all very well," said Jack

The Primary Planets.

The primary planets are those which nervee. It is not a stimulent but a are the centers of secondary systems, health builder and the children as well consisting of small globes revolving round them in the same manner as they revolve round the sun. These are called secondary planets, satellites or moons. The primary planets which are thus attended carry the satellites or secondary planets with them in their orbits round the sun.

THE BIRTH OF THE MOON.

When the Earth Was a Sphere of Lava, Molten and Flattened.

The earth revolves on its axis once ir 24 hours. Millions of years ago the day was 22 hours; millions of years before it was 21 bours. As we look backward into time we find the earth revolving faster and faster. There was a time, ages ago, long before geology begins, when the earth was rotating in a day of five or six hours in length. In the remotest past the earth revolved in a day of about five hours. It could revolve no faster than this and remain a single unbroken mass.

It was at this time that the moon was born-separated, broken off from the parent mass of the earth. The earth was then a molten, flattened sphere of lava. Its whole body was fluid. The tides, which now are small, superficial and, so to say, local, were then universal and immense. They occurred at short intervals. The whole surface of our globe was affected. And the corresponding lunar tides in the fluid, molten moon were indefinitely greater still.

Our day is now 24 hours; the distance of the moon is now 240,000 miles. When our day was about five hours long, the moon was in contact with the earth's surface. It had just broken away from its parent mass. As the length of the terrestrial day increased, so did the distance of the moon. The two quantities are connected by inexorable equations. If one varies, so must the other. Whenever the rotation time of a planet is shorter than the period of revolution of its satellite, the effect of their mutual action is to accelerate the motion of the satellite and to force it to move in a larger orbitto increase its distance, therefore,

The day of the earth is now shorter than the month-the period of revolution-of the moon. The moon is therefore slowly receding from us, and it has been receding for thousands of centuries. But the day of the earth is, as we have seen, slowly growing longer. The finger of the tides is always pressing upon the rim of our huge flywheel and slowly but surely lessening the speed of its rotation. So long as the terrestrial day is shorter than the lunar month, the moon will continue to recede from us.-Professor E. S. Holden in Harper's Magazine.

SIMPLE REMEDIES.

Diluted ammonia is good for insect bites and stings.

A raw egg swallowed at once upon getting a fishbone in the throat beyond the reach of the finger, it is said, will dislodge it and carry it down.

A simple remedy for indigestion is froth and stirred into a wineglassful you to take a case. of cold water. This should be taken after each meal.

For burns and scalds, when no other cially useful when cooking, for the vinegar is generally at hand.

To cure a severe case of colle take a tially one people and that matters upon Arabia, in the Sahara and the deserts tenspoonful of salt in a pint of water; drink and go to bed. This is one of the speedlest remedles known. It will also prove efficacious in reviving a person who seems almost dead from a heavy

Preparing For a Journey.

Jerome K. Jerome recalled, with uncle who, before packing for a journey, always "made a list." This was the system which he followed, gathered from his uncle's own lips:

on it everything you can possibly require. Then go over it and see that it contains nothing you can possibly do

Imagine yourself in bed. What have you got on? Very well; put it down, together with a change. You get up. What do you do? Wash yourself. What do you wash yourself with? Sonp. Put down soap. Go on till you have finished. Then take your clothes. Begin at your feet. What do you wear on your feet? Boots, shoes, socks. Put them down. Work up till you get to your bead. What do you want besides clothes? Put down everything.

This is the plan the old gentleman always pursued. The list made, he would go over it carefully to see that be had forgotten nothing. Then he would go over it again and strike out everything it was possible to dispense with. Then he would lose the list.

The Backslider.

"Many years ago," says the Provi-dence Journal, "In a village not 20 miles from Providence a revival was in progress. A young man, one of indistinguishable twin brothers who had previously been observed, as was supposed, in an attentive attitude at the meeting, rose for prayers, walked to the anxious seat, and there wailed and monned to such good purpose that the deacons were sure he was on the high rond to salvation.

The next day he was overheard in the back yard at home chopping wood and swearing painfully at a refractory lcg. When remonstrated with for his sudden backsliding, he merely said, "Oh, brother Jim couldn't go to the meeting last night, so I went and hollered for him."

Meant What It Said.

"No," said the impecunious one, "you can't believe all that you see in the newspapers." "Are you prepared to specify?" the

other man asked. "I am. I saw a statement to the

financial columns that money was easy. but when I tried to negotiate a loan I found that the reverse was true." "You misunderstood the paragraph. It didn't say the people were easy."-

PARTRIDGE EGGS.

Said to Be More Nutritions Than the Birds Themselves.

"Few persons are aware of the fact," said a well known physician, "but it is true, nevertheless, that the egg of the partridge is one of the most nutritious things in the world. They are not used for eating purposes except in very rare cases, and then it generally happens in remote rural districts. I have known negro families in the state of Louisiana during the laying season to live on the eggs of partridges. And they would flourish handsomely and grow fat on account of the rich properties of the

"These eggs, of course, never find their way into the market because they are never taken from their nest except by such persons as I have mentioned, and they rob the nests, I suppose, because their principal food supply comes from this source. Quall ment comes pretty high in the market at all times, and the average man will find it more profitable to spare the eggs and wait for the birds when the bunting season rolls around. These men would pass 100 nests in one day without disturbing an erg. The sport of hunting the birds is an additional incentive.

"The average negro does not care so much about this aspect of the case. He figures that the white man, having the best gun od the best dog, will best him to the bird. So he goes after the egg. One partridge will lay anywhere from 12 to 20 eggs, and a nest is a good find. I know of many families in rural sections who feast on these eggs in the laying season. I have tried the egg myself as an experiment. I found it peculiarly rich. It has a good flavor, is very palatable and in fact is altogether a very fine thing to est. Really I be-Heve that the egg has more nutrition in it than the fully developed bird, but of course, as one of the men fond of the game in the field, I would like to discourage the robbery of the nests."-New Orleans Times-Democrat.

HUSTLING FOR BUSINESS.

More or Less of It Done In New York Lawyers' Offices.

"Get a move on! That's the great modern motto," said a New York lawyer who has been practicing in the local courts for the last 25 years.

"When I was admitted to the bar," he went on, "there was a great idea of the dignity of the profession. A lawyer would about as soon have paraded Broadway carrying a sandwich sign calling attention to his legal ability as he would have thought of bustling in any other way for business. The thing to do was to rent an office and sit in it until somebody came and dug you out the white of an egg begten to a stiff of the dust and spider webs and asked

"The march of progress has changed all that. Every law firm in this city hustles for business. I don't mean remedy is at hand, try the effect of a plece of rag steeped in vinegar and around after clients. Of course they ound round the scar. This is espe- don't. But the firm does a lot of shrewd planning ahead. It schemes in a particular fashion of its own to widen its sphere of usefulness-to itself.

"Of late years one of the expedients adopted has been the taking into the firm of young college graduates who can give a reasonable guarantee that they will bring business. College men know of this custom, and many of them shape their life at the university accordingly. They are after friends. They want to be popular. They want reverence, a habit of his methodical to be able to 'swing' as much of the future legal business of their fellow graduates as they can.

"A chap who can bring business of that sort is taken in on a good salary Take a piece of paper and put down even when he is the veriest tyro at law. He's expected, of course, to do what real work he can and to study hard. But the salary is for the pull he can exert over his fellows."-New York

He points his trunk straight at the biscults and blows them hard along the floor to the feet of the persons who have thrown them. He clearly knows what he is doing, because if the biscuit does not travel well he gives it a harder blow.

Iron In the Sixteenth Century.

The cost of the railings around St. Paul's cathedral (claimed by several Sussex parishes, but really made at Lamberhurst, a parish partly in Kent) is recorded in the account books of the manufactory as having been £11,202 0s. 6d. The total weight was 200 tons. The amount of employment given may be conjectured from the statement of Richard Woodman, one of the Marian martyrs burned at Lewes in 1557, that he had set a hundred persons to work for the year together .- London Specta-

Sober Second Thought. "I thought I was riding into office on a wave of popular enthusiasm!" "Yes?"

DR. FENNER'S

amily Medicines.

Kidney and Backache

Dyspepsia Cure

For Coughs, Colds, Grip, or "Cold" in ANY PART of body.

COLMAN, Mich., Sept. 27, 1900. For a whole year I could do no work and walked only by holding on to a chair. I doctored with four different physicians but received no relief. The use of two bottles of Dr. Fenner's Kidney and Backache Cure gave me a perfect cure. J. M. Mckinser.

GENEVA, Crawford Co., Pa., June 18, 1990.
Three years ago I had a severe attack of Erysipelas and blood polsos, breaking out on my head and face. My physician attended me for several months without result. I then took 3 bottles of Dr. Fenner's Blood and Liver Remedy and Nerve Tonic and secured a complete cure.

FRANK BARKMAN.

My wife has suffered long with dyspepsia. I tried all of the pepsin preparations and all of my own prescriptions without avail. I finally prescribed Dr. Fenner's Dyspepsia Cure and the use of it effected a cure. Many other similar cases that have come under my observation have been cured by his Dyspepsia Cure.

Dr. F. J. Lanangood.

My Dear Dr. Fenner, Fredonia, N. Y.
I have used Dr. Fenner's Golden Relief for many years for the diseases and accidents for which it is advertised and have found it

Presiding Elder M. E. Church Used for Cuts, Bruises, Burns, Old Bores, Sprains, Colds, Grip, Sore Throat, Colle, Dysentery, Bowel Troubles, it is unfailing.
