Stop the Blight

It is a sad thing to see fine fruit trees spoiled by the blight. You can always tell them from the rest. They never do well afterwards but stay small and sickly.

It is worse to see a blight strike children. Good health is the natural right of children. But some of them don't get their rights. While the rest grow big and strong one stays small and weak.

Scott's Emulsion can stop that blight. There is no reason why such a child should stay small. Scott's Emulsion is a medicine with lots of strength in it—the kind of strength that makes things grow.

Scott's Emulsion makes children grow, makes them eat, makes them sleep, makes them play. Give the weak child a chance. Scott's Emulsion will make it catch up with the rest.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle. Send for free sample. SCOTT & BOWNE, 400 Pearl St., New York. 50c and \$1. all druggists.

The eminent kidney and bladder specialist.

There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, or the kidneys themselves break down and waste away cell by cell. Then the richness of the blood—the albumen—leaks out and the sufferer has Bright's Disease, the worst form of kidney trouble.

Dr. Kilmer's Swamp-Root, the new discovery is the true specific for kidney, bladder and urinary troubles. It has cured thousands of apparently hopeless cases, after all other efforts have failed. A sample bottle sent free by mail, also a book telling about Swamp-Root and its wonderful cures. Address Dr. Kilmer & Co., Binghamton, N. Y., and mention this paper.

"I wish to say that I feel I owe my life to Kodol Dyspepsia Cure," writes H. C. Christenson, of Hayfield, Minn. "For three years I was troubled with dyspepsia so that I could hold nothing on my stomach. Many times I would be unable to retain a morsel of food. Finally I was confined to my bed. Doctors said I could not live. I read one of your advertisements on Kodol Dyspepsia Cure and thought it fit my case and commenced its use. I began to improve from the first bottle. Now I am cured and recommend it to all." Digests your food. Cures all stomach troubles. Geo. Harding.

December 7. Come, all ye young men, with your pockets full of cash, as there will be a basket for each of you, if you have the money. Proceeds go to buy a bell for the new school house.

John and Lester Sprague are on the sick list.

Services were held in the new church Sunday. Elder G. P. Rich preached to a well filled house both morning and evening. Two additions were added to the church. The Christians of Stone feel greatly encouraged, as the house has been built and completed and has only a few dollars of debt. Meetings will be continued during this week. The ordinance of baptism will be administered next Sunday morning. Preaching by Elder Tullinger, of Molalla. All are invited to come.

A. J. Snell wanted to attend a party, but was afraid to do so on account of pains in his stomach, which he feared would grow worse. He says, "I was telling my troubles to a lady friend, who said: 'Chamberlain's Colic, Cholera and Diarrhoea Remedy will put you in good condition for the party.' I bought a bottle and take pleasure in stating that two doses cured me and enabled me to have a good time at the party." Mr. Snell is a resident of Summer Hill, N. Y. This remedy is for sale by G. A. Harding, druggist.

AN EFFECTIVE REMEDY.

A Series of Orders That Rejuvenated the Aging Slaves.

A correspondent sends the following story of an old Virginia gentleman:

Some years before the war a gentleman of large landed interests counted among his possessions a plantation on the James river, an estate of considerable dimensions. Other interests kept him away from the old place for some years, during which time there was a marked decrease in the revenue. Upon his return to the plantation he discovered that many of the slaves were laid up with rheumatism and other miseries, the farming implements were in bad order and the old homestead was fast going to rack and ruin. Calling his overseer he said:

"Anderson, I notice a great many old wagons, plows and harrows about the place. Have them brought and piled in front of the house, and on Monday next order all the niggers on the place to be present."

At the appointed time they came. The pile was set on fire and the implements destroyed. The following week he called the overseer's attention to the sick and infirm horses, hogs and cattle and gave the same order. When the negroes had assembled all the animals were knocked in the head. The Friday following the landlord again called his overseer.

"Anderson, I see a great many sick niggers around here—many who seem to be laid up with rheumatism and are good for nothing. Give orders that on Monday morning at 10 o'clock they all appear in the front yard."

The effect on the slaves was magical. On Saturday men who had been unable to walk were skipping around like children; the sick grew well suddenly, and from that time on the plantation was most prosperous.—Exchange.

FOOD OF AMERICANS.

An English Woman Tells of the Strange Things She Ate Here.

An English woman who visited America a short time ago has been telling her country women about the "strange food across the water." Of course she discovered green corn, but she had been prepared for that. Oyster crabs were quite new to her.

"They look like Boston baked beans," she explains, "but they taste much better."

An oyster cocktail filled her with awe and enthusiasm. She tried it at Delmonico's and thought it was soup. Of course in England one didn't serve soup in a glass; but, then, neither did the English serve boiled eggs in a glass. One could never be sure of Americans.

Of canvasback duck she has a poor opinion, but thinks she might like it better if Americans would have it cooked or even warmed. As for terrapin, she slings its praise. She found it much like calf's head, and she always liked calf's head. Shades of Maryland gourmet, what a slur is there!

"All the puddings in America are pie or ice cream," she says, but it must be understood that pie does not mean game pie. The Yankee pie is a tart and is ubiquitous, she explains.

She sat next to an American man who ate a lump of cheese with his strawberry pie and turned a plateful of ice cream over both, but she doesn't know that that is a general custom.

The oysters were good, but had most impossible names, and the cockles (meaning clams) are excellent. On the whole, Yankee food and cooking are good, but there is too much of the food on the table at one time.—New York Sun.

Saved His Life.

"I wish to say that I feel I owe my life to Kodol Dyspepsia Cure," writes H. C. Christenson, of Hayfield, Minn. "For three years I was troubled with dyspepsia so that I could hold nothing on my stomach. Many times I would be unable to retain a morsel of food. Finally I was confined to my bed. BEAUTY SPOTS.

Try lemon juice for whitening the neck. Apply it with a linen cloth.

After the head has been shampooed, whenever possible, give the head a sun bath.

A writer states that oily hands may be made comfortable and touchable by wetting them once or twice a day while clean with cologne, alcohol or toilet vinegar.

A good circulation is essential to the growth of the hair as well as to its color and fineness. A frequent, vigorous brushing with a stiff brush is the best method of obtaining this.

A writer upon the complexion says the best way to treat freckles, a sure cure in all but very obstinate cases, is to touch them night and morning with a camel's hair brush after dipping it in lemon juice.

For a greasy skin nothing is better than the combination of an ounce of dried rose leaves, half a pint of white wine vinegar and half a pint of rosewater. Let the vinegar stand on the rose leaves for a week, then add the rosewater. Use a teaspoonful in a cup of distilled water.

A Geological Fallacy.

Probably the most wild and unjustifiable of all the crude beliefs respecting geological resources is that which holds to the conviction that by going deep enough the drill is sure to find something of value, no matter at what point the work of boring is commenced.

There are numerous wise persons in every community, estimable, influential and in the highest degree public spirited who are convinced that the question, for example, of finding coal in their special locality is simply a matter of the depth to which the explorations are carried. Rock oil and natural gas are recognized as desirable products in every progressive community, and every such community contains persons in other respects intelligent who are ready to stake their own fortune and that of their nearest friends on the belief that oil and gas are everywhere underneath the surface and that their sources can be tapped with the drill provided only there is sufficient capital to keep up the process of drilling long enough—Mines and Minerals.

Professional Shoppers.

Professional shoppers are employed by a certain large firm of London drapers to test the abilities of shop assistants. This firm owns over thirty large shops and employs nearly 1,000 assistants. To find out whether every customer is politely served a number of lady customers are employed to call at the various shops. They are told to give as much trouble as possible and sometimes to leave without making a purchase after looking at nearly everything in the shop. Should the unfortunate assistant's temper not be equal to the strain, or should a single word be said that might offend, a report will infallibly reach headquarters and lead to the dismissal of the sorely tried händler of silks and ribbons.

An Example.
