Annual Report of the Board of Water Commissioners.

OREGON CITY, OREGON, January 1st, 1902.

To the Honorable the Mayor and City Council of Oregon City, Oregon.— Gentlemen: In submitting this report to your honorable body, we wish to draw your attention to the very flattering showing of the finances of the city water works and the progress the board has made in the past year towards improving the water supply.

Owing to the laying of sewers in District No. 2, there has been quite a revenue derived from new consumers and an increase from those already supplied, which has increased from the steady growth of the city, which has kept the water works well occupied, accounts for the \$244.95 increase of revenue over last year.

Twelve hundred feet of 2-inch galvanized main was run on 8th street to the date consumers in Sewer District No. 2. This small main was run at one-half the cost of a larger size, and is ample, as there are large mains on both 5th and 8th streets.

Five hundred feet of 4-inch cast main was run from the extension of the Monroe street to Third street and thence west to Madison street, where the same is connected to the present 2-inch main on Third street, thus making a complete main from Fifth on Monroe to Third, thence west to Jefferson, thence north to the place where the same was contemplated in our communication of July 1901.

The breaking of a large pair of gears connecting the Worthington pump and water wheel caused the easing on the water wheel to be badly cracked and damaged to the extent of \$350. It was also necessary to have an extra elbow in patched one falls, as it takes a month to get such parts from the East. This expense of repairing the Worthington pump and gears, has cost \$760.00. The gears are liable to occur at any time, and it is the policy of the Board to keep spare parts on hand to meet such emergencies.

The Worthington pump is in bad condition and has always been a source of anxiety, owing to the short connecting rods, which place the driving gear an unnecessary strain. To overcome this trouble, the Board has plans prepared to double the length of the connecting rods and have the pump driven by two sets of changeable gears—all bearings to be placed on one large casting, which will be attached to the pump and water wheel, thus doing away with the destructive vibration. This improvement will increase the general overhauling of the pump and will make it more than new. The cost will probably not exceed two thousand dollars. As stands, the pump is practically worthless.

In our report last July we mentioned in detail the progress for a better water plant and stated that we would extend the intake up the Basin, and also that the plant had been contracted for and would be installed in the next four months.

We can now report that we have laid an 18-inch steel pipe along the east side of Basin some 600 feet to a point opposite Station "A," where a temporary crib is in place. It is the intention to extend the pipe some 700 feet farther up the Basin and the pipe is on the ground for that purpose, but as there was a month's delay in getting the pipe, it came too late to admit of being laid. Unless it shall prove to be very where the intake now ends, this extension will be completed next summer. This improvement will certainly add to the quality of the water.

The construction of the filter plant has been pushed as rapidly as possible under circumstances, and if it were not for the delays in obtaining the pipe and fittings, it would have been in operation at least a month ago. As it now stands, it has but a few days before a preliminary trial can be given.

The Board has had a substantial saving of \$25 built to accommodate the increase in capacity of the plant 500,000 gallons per day when needed. The building set on a foundation, which is at the same time a reservoir for filtered water and has capacity of about 65,000 gallons, which is enough to supply the pumps for an hour when the filters are not working.

Two large settling tanks, holding 40,000 gallons each, are placed at the rear of the building, and their duty will be to remove the bulk of the suspended matter before the filters.

The California Jewell Filter Company, of San Francisco, Cal., through their manager, M. Steenish, came on the grounds with their material during the latter part of October, as soon as the building was well under way, and have pushed their work as rapidly as the progress of the work would admit. The machinery and workmen have very appreciably been first class in every respect and will no doubt fully meet the requirements of the contract. The plant will be operated for thirty days of trial, which will afford abundant opportunity to test its merits and prove if it is what is guaranteed of it. Two hundred and twenty cities in the United States use this system, and this plant will be the latest up-to-date of any of them.

We have provided a system of piping that is ample large enough for many years to come, and have so arranged same that the pumps can be run independently of the intake pipe, and an accident to the intake pipe will not affect the filters or the water supply. There remains but little more to be done to complete the work, and considerable uncertainty of many items that could not be accurately estimated and the uncertainty of expense of repairs, the Board is able to state that the expenses are reasonably well within \$25,000 previously estimated.

The completion of the filter plant should mark a red-letter day in the history of Oregon City, and when once filtered water is an assured fact, the citizens may well be proud of the fact that they have the best and cheapest means of obtaining a pure water supply that is within reach of a modern city of this size.

The following statements give the expenditures for the past six months and the cost of the improvements and the approximate value of the water works and accessories:

Table with 2 columns: Category and Amount. Receipts: July collections: 1000, August: 1000, September: 1000, October: 1000, November: 1000, December: 1000. Disbursements: Semi-annual interest on bonds: 1000, Telephone repairs: 1000, Water wheel repairs: 3500, etc.

Table with 2 columns: Category and Amount. FILTER PLANT: Portland General Electric Co. 50x150 ft. site: \$3,000.00, A. S. Dresser, City Attorney, legal services: 15.00, Cal-Jewell Filter Co. 50 per cent of contract on filters: 6,395.00, etc.

Table with 2 columns: Category and Amount. APPROXIMATE VALUE OF THE CITY WATER WORKS: Worthington pump, Victor water wheel, iron flume, station, etc.: 100,000.00, Intake pipe line, 1300 feet 18-inch steel pipe, labor and material: 1,480.71, etc.

Total valuation: \$101,480.71.

INDENTURES: Water bonds, bearing 6 per cent interest and having two years to run: 100,000.00, Floating debt, outstanding warrants bearing 6 per cent interest: 1,480.71.

CONCLUSIONS: Annual gross earnings the year just closed being: 244.95, Estimated expense of operation for the ensuing year including interest: 100,000.00.

Annual net gain to be applied on indebtedness: 144.95. There are about five miles of mains on which nearly 400 consumers are supplied, and some sixty fire hydrants, which afford at all times the best of fire protection to the city.

With the improvement from filtered water and the natural increase of revenue expected in consequence, there should be no further cause of complaint regarding the water supply.

Respectfully submitted, BOARD OF WATER COMMISSIONERS: CHARLES H. GAUFIELD, President, T. L. CHARMAS, Secretary.
