#### HE DIDN'T KNOW.

"Man wants but little here below"-The line's familiar to us all. A good man wrote it long ago-He didn't know Pierp. Morgan, though, Or "Yim Hill of Sant Poll."

TREASURY AND NEW TREASURER The succession of Governor Leslie M. Shaw, of Iowa, to the Secretaryship of the Treasury, is being accepted in all parts of the country with evident satisfaction. The money centers of the East appear complaisant over the event, as Mr. Shaw is a man whose financial record is known and approved among them, while the West is pointing out with delight that he is the first head of has his bottle filled and knows where government finances to be chosen from the next one is coming from, the country west of the Mississippi. He will, consequently, enter office with the support and good-will of banks and bankers in every section. The finances of lin M. Carter. His next move doubtthe United States are under the direct control of Congres, and the Secretary is generally little more than an executive officer. Governor Shaw has won his place by a vigorous support of sound money and advocacy of the gold standard, and his work in the Treasury Department will be largely measured by the influence which he can exact upon Congress in improvement of financial policies.

When he enters the treasury his position will be unique among the fisca agents of the world. While other nafions are struggling with new methods of taxation and avoiding swelling deflicite, Mr. Shaw will be confronted with ques tions of tax reductions, bond payments, and surplus management-all concomitants of an overflowing treasury. On the first of January there was about \$325, 000,000 for the Secretary to draw uponthe available cash being \$175,000,000, and the reserve fund \$150,000,000. The excess of receipts over expenditures for the last six months is about \$45,000,000. which, notwithstanding the reduction of internal revenue taxes, is estimated will be increased to \$100,000,000 by the end of the fiscal year on June 30th next. The problem before the new Secretary will be that of controlling this increasing surplus, which, if continued, is likely to lead to unhealthy financial conditions. The only method in the hands of the Secretary is to apply it to the reduction of the national debt. There is no limit to the amount of bonds he may purchase with the surplus, but he will be con fronted by the fact that in good times the holders of the bonds are not anxious to sell, and to bid too high a premium to secure them would be bad financiering. Leaders in Congress are waiting to see what appropriations will be called for. They anticipate an increase of expenditures on account of the isthmian canal, the Pacific cable, additions to the navy, I have used this remedy in my family and possibly the passage of a ship sub- for the past seven years and have never most of the remaining war taxes.

completed has cost the city quite a sum lain's Cough Remedy. It counteracts overcomes Constipation, improves Apof money. It has been erected with the any tendency of a cold toward pneumo- petite, gives perfect health. Only 50c idea that the water used by the city will nis. Sold by G. A. Harding, Druggist, at G. A. Harding's drug store.

be purified. That the water needs purification no one will question. If the plant will do the work intended that it shall do no one will criticise the expenditure. The health of the city is too serious an affair to admit of any other course no matter how high the cost. It is hoped and believed that the water hereafter care furnished will be such an improvement on that furnished in the past as will satisty all critics.

Is another column will be found the expenditure of the county for the last year exclusive of road expenses. This expenditure of the county is made the basis of fixing the proportion of the state tax the county pays. The legislature county pays for five years. After that until grass grows again. time the part each county pays will be determined by the amount spent by each county locally. So that economy at home will result in a reward of ten taxes to pay the state.

Senator Simon lodged charges of incompetency against Mr. Bibee and the president says these charges are not sustained and his name will go to the senate soon. It is about time obstructive methods important, took a rear seat. They are never sustained in the end. It looks as if Mr. Bibee would have the last laugh and that soon.

Tug annual report of the financial transactions of Oregon City for 1901, is published in another column and shows a very satisfactory condition of affairs, The finance committee, of which Mr. R. Koerner is chairman, has exercised a strict supervision over the finances of the city and the administration just closed has been an economical one.

Ir you are not registered you must do it in order to vote next June. You must register again no matter if you were registered at the last election. Do not put heads of barley. The band was turned this off as you will want to vote in June.

#### Astoria Makes a Discovery.

During the recent cold snap, some merchants of Oregon City sent a large lot of the finest apples this market had ever seen down here to be sold. There was a glut and they were not disposed of and were left on the Larline dock. The cheap or inexperienced hand, that is, i Gloria Mondis, V rginia Greenings and Baldwins are such fine apples that they make the mouth water to look at them. Their flavor is something seldom found here. The cold snap prevents shipments east and runs the price down. There are immense piles of the 75 cent apple season, with a daily capacity of 10.850 boxes on the dock waiting for a purchaser.-Astoria News.

Sheep Killed By Eating Barley.

The Lakeview Examiner reports a large loss of sheep through eating fallen into a field of barley that had been cut and are a great many of the heads which had fallen down. The first day between 600 and 800 died and it was expected to declare that dairing is a failure, that 400 more would follow the first lot.

#### Swif. Spud Digger.

G. H. Williams, a potato grower, has ocated at Barlow. He expects to plant about 80 acres to potatoes the coming season. He has a machine for digging spuds which he has invented himself. Under favorable conditions he is able to dig up to seven acres per day with it .-Aurora Borealis.

### Farmer Facts

Healthy cows cannot long remain so in unhealthy surroundings, nor when fed or watered irregularly,

Because a farmer has a big barn and a there will be a much higher price in small house does not, by any means, in- | wool during the coming year than there fer that he is a poor farmer. The European demand for cavalry pretty well cleaned up and purchases
