Why is it that the firstborn child is so often the healthiest of a family of children? The reason seems to suggest it-self. As child follows child the mother has less and less vitality; often not enough for herself and none, therefore, for her child.

Expectant mothers who use Doctor Pierce's Favorite Prescription find that it keeps them in vigorous health. They eat well, sleep well and are not nervous. When baby comes its

advent is practically painless, and the mother is made hap py by the birth of a healthy child. If you would be a healthy mother of healthy children use "Favorite Prescription."

"I will be very glad to say a few words for Dr. Pierce's Favorite Prescription," writes Mrs. P. S. Douglas, of Mansonville, Imme Co., Quebec. "During the first four months, when I looked forward to becottning a mother, I suffered very much from nousea and womiting, and I felt so terribly sick I could scarcely eat or drink saything. I bated all kinds of food. At this time I wrote to Dr. Pierce, and he told me to get his 'Favorite Prescription' and a bottle of 'Goden Medical Discovery.' I got a bottle of each, and when I had taken hardly three parts of each bottle I felt well and could eat as well as any one, and could do my work without any trouble (I could not do anything before). I feel very thankful to Dr. Pierce for his medicine, and I rell all who lell me they are sick, to get these medicines, or write to Dr. Pierce."

The County Clerk reports the assessable property in the district to be \$642,-830, (which is about \$1100 more than last year). Should a six mill tax be levied, the same as last year, it would produce \$3857, which would reduce the Floating Debt to \$7318. But as the tax for 1903 would be partly paid in by that time, the amount would be reduced somewhat at the expense of the next year, which would be that amount short.

Owing to the high rate of taxation this year, we think six mills is as much as should be levied at this time and therefore base our estimate of receipts at that

We have given the matter careful to expend from now until the close of the thought and have concluded that the fiscal year, June 30, 1903, amounts as best thing for us to do is to add two new rooms to the Barelay building, which we think can be done advantageously, as ance of present year \$ 2152 50 the plan of that building will permit of the addition of two rooms back of the main building and south of the ell.
