"FACTORY GIRLS."

The Graceful and Handsome Women who Work at the Loom.

Any one who has lived in a factory town and has seen the tide of human life which floods the streets when the mills stop for the day, will have been struck by the number of graceful and handsome young girls among the throng. Light hearted, smiling, mirthful, it is hard to realize that they have just left a day's fatiguing work. But another sight attracts the onlooker. He sees groups of other women, thin of form, dull of eye,

languid of movement, and he realizes that these were but a few years ago as bright and happy as their younger fellow-workers. It is natural to ask the cause of such a physical change, which is not to be explained by the stress and strain of daily labor, because there are not a few who, in spite of years of steady work, retain the girlish attractiveness of face and figure. Perhaps the most important cause of this change is to be found in the prevalence of ailments peculiarly feminine, which drain the vitality and sap the strength. If the truth were known it would be found that these women had been working under physical conditions, which, if a man suffered them would be enough to send him to bed. With throbbing head and aching back the wage earner pleads, on feeling that she cannot afford either to rest or pay a physician's fees, and every day sees her grow more weary and more weak.

THERE'S NO NEED TO STOP WORK or pay expensive fees in order to be cured of womanly diseases. Hundreds of thousands of weak and sick women have been made well and strong by the use of Dr. Pierce's Favorite Prescription. It establishes regularity, dries the drains which weaken women, heals inflammation and ulceration and cures female weakness. It makes weak women strong and sick women well.

"A few years ago I suffered severely with female weakness and had at times dreadful pains," writes Mrs. V. Brown, of Creswell, Harford Co., Maryland. "I went to my doctor, and he gave me medicine which did me good for a while, but I would get worse again. I had a sick headache nearly all the time; was so weak around my waist could hardly bear anything to touch me. My feet would keep cold and I could hardly do my work. I would work a while and then lie down a while; was completely run down. Suffered from disagreeable drain and also severe pains at times. After using five bottles of Dr. Pierce's

Something That Will Do You Good. We know of no way in which we can be of more service to our readers than to tell them of something that will be of real good to them. For this reason we want to acquaint them with what we consider one of the very best remedies on the market for coughs, colds, and that alarming complaint, croup. We refer to Chamberlain's Cough Remedy. We have used it with such good results in our family so long that it has become a household necessity. By its prompt use we haven't any doubt but that it has time and again prevented croup. The testimony is given upon our own experience, and we suggest that our readers, especially those who have small children, always keep it in their homes as a safeguard against croup—Camden (S. C.) Messenger. For sale by G. A. Harding, Druggist.

THE WILLIAMSON-HARDING CO. UNWRAPPING and DENYING.

WOMAN'S RELIEF. A really healthy woman has little pain or discomfort at the menstrual period. No woman needs to have any. Wine of Cardui will quickly relieve those smarting menstrual pains and the dragging head, back and side aches caused by falling of the womb and irregular menses. WINE OF CARDUI has brought permanent relief to 1,000,000 women who suffered every month. It makes the menstrual organs strong and healthy. It is the provision made by Nature to give women relief from the terrible aches and pains which blight so many homes. Gasmansville, La., Oct. 14, 1899. I have been very sick for some time. I was taken with a severe pain in my side and could not get any relief until I tried a bottle of Wine of Cardui. Before I had taken all of it I was relieved. I feel it my duty to say that you have a wonderful medicine. Mrs. M. A. Young.
