Church Lights and Social Leaders.

Every community, however small, has Rvery community, however small, has its group of energetic women, who lead and light the way in every local enterprise. If it is charity, a bazaar, a church fair, or any other benevolent undertaking, they work day and night to make it a success. They are not the women who neglect their homes to serve the public. They simply do double service. Many a husband knows what it is to bring his wife home from a fair or bazaar, near the wife bome from a fair or bazaar near the hour of midnight and see her drop, in sheer exhaustion, into the first chair she comes to. What shall be said then of those women, who are not strong, who suffer from headache, backache bearing-down witts, and other conse-quences of a diseased condition of the womanly organism? And these women are in the great majority. peculiar to their sex.

BURNING THE CANDLE AT BOTH ENDS That expressive saying not only sug-gests the most rapid form of waste but also the most foolish. When a woman overtaxes her strength in any cause, whether in the enjoyment of social pleasures, or in the service of church or charity, she is rapidly hastening to the end of her public activity.

The proof of this is found right at

Young matrons who are not dancing any more, church workers who are no more active; these have not step-ped aside because of loss of interest but because of lack of strength.

There is not a weak woman who would not like to be made strong again. There is not a sick woman who would not like to be made well. And there is not the least reason, in ninety-eight cases out of every hundred, why women should continue to be weak and sick. The first step to the re-establishment of the gen-eral health is to establish the local womanly beaith.
