CIRCUIT COURT.

iderable Business Transacted at Short Term Heid in This City Satur day by Judge McBride.

Judge McBride held a short term of circuit court here last Saturday, when the following matters were heard:

A decision was handed down in the matter of Mrs. Turney vs. the Southern Pacific Company, tried before the court at its last session, when the plaintiff was given a verdict of \$4325. The defendants Enters a Wheatfield and With His Refiled a motion to set aside the verdict as excessive, but Judge McBride denied the motion and sustained the verdict of the jury. He gave the defendant 60 days in which to file exceptions, and the plaintiff 30 days in which to answer them in case such are made.

A divorce was granted to Alice M. Conners from Thomas Conners.

The matter of quieting title to a one-sixth interest in block 62, of the tiray place at Milwaukie, was decided in favor

of Oscar Brun. A foreclosure of mortgage was ordered in the suit of Mary Mader vs. Thomas Charman, Sophia Charman, James P. Lovett, Benjamin Jaggar and J. M. Tracy. The mortgage was secured by a note for \$3000 and judgment was obtained for this Water street to Sixteenth, thence up amount with 8 per cent interest from March 7, 1900, costs of action and \$350

TRACY IS DEAD

Takes His Life Rather Than Be Captured Alive.

LEG BROKEN BY POSSE BULLETS

volver Biows of the Top of His Head.

The eventful career of Harry Tracy, desperado, murderer, convict, came to a close Wednesday morning at 4:30 in a wheat-field near Fellows, Wash. In a fight with a posse of citizens during the night he was wounded in the right leg and, knowing his capture was certain, blew the top of his head off with a revolver. Tracy escaped from the Oregon penitentiary at Salem, June 9 last, in company with David Merrill, after kill-ing three guards—Frank W. Ferrell, G. R. T. Jones and B. F. Fiffany—and wounding Frank Ingraham, a convict, who tried to prevent his flight. On June 28 Tracy killed Merrill, near Napavine, Wash., shooting him from behind and wasn., shooting him from benind and leaving his body in the forest, where it was found on Joly 15. On July 8, near Seattle, in a fight with a posee, Tracy shot and killed Charles Raymond, a deputy sheriff; E. E. Breese, a policeman, and mortally wounded Neil Rawley, who died the following day.

Upon examination of Tracy, s body it was found that the wound which resulted

was found that the wound which resulted in the outlaw's death was inflicted by a 45-calibre revolver, held close to his forehead. The top of his head was badly mangled. Two builet wounds on the left leg showed the cause of the man's despondency. One shot had broken the leg between the ankle and knee. The other cut the tibial artery, which of itself was sufficient cause for death. It is believed that both of these shots were received after the convict left the shelter of the rock and made his break for the wheatfield. The murderer had taken a strap and buckled it tightly around his leg in an attempt to stop the bleeding. Despite the tightly fastened strap, the bleeding continued until he, probably realizing his hopeless condition, ended

the struggle.
Tracy's life is summed up as follows: Born, in Wisconsin, 1874. Arrested in Colorado for murder and roke jail 1897.

Arested in Utah for burglary and broke ail, 1897.

June 9, 1902. Committed suicide near Fellows, Wash., August 5, 1902.

J. J. COOKE.

A MAN CAN'T swim in shackles.
It isn't a question of his winning a race, but a question of being able only to keep afloat. The man who is suffering from malnutrition is like the fettered swimmer. His stomach and

its allied organs of digestion and nutrition are diseased. It is not a question with him of winning in the race for business but of simply keeping up under circumstances, Whenever disease affects the stomach

it is affecting also the blood and the health of every organ of the body. For blood is only food converted into nutrition and nutrition is the life of the body and every organ of it.

Doctor Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutri-tion. It purifies the blood and enables

the perfect nutrition of the body which means perfect health.

"For six long years I suffered with indigestion and my liver and kidneys, which befiled the best doctors in our country," writes B. L. Ransell, Esq., of Woolsey, Prince William Co., Va. "I suffered with my stomach and back for a long time, and after taking a 'cart-load' of medicine from three doctors I grew so bad I could hardly do a day's work. Would have death-like pains in the side, and blind spells. I began taking Dr. Pierce's Golden Medical Discovery and 'Piessant Pellets. Before I had taken half of the second bottle I began to feel relieved. I got six more bottles and used them, and am happy to say I owe my life to Dr. Pierce."

DAIRY NOTES.

Good butter should be solid from the time it is put upon the table.

Any excitement in the dairy cow tends to lessen the flow of milk. Failing to get all the buttermilk out

causes butter to become rancid soon. To obtain the best results in churning the cream should be only slightly sour. In winter the cream should be warm-

ed up to about 66 degrees before putting in the churn. One advantage in brine salting is

or mottled butter. The milk should always be skimmed while sweet and the cream then allow-

ed to turn slightly sour. Sometimes butter has white specks Tel. 914. distributed through it. This is caused by oversourness in the cream.

In butter making next to controlling the temperature is to churn often while the cream is in good condition.

With temperature under control and churning done at the right time the butter will become solld and be easily handled.

On the farm to make the most out of the milk and butter some of the cows should be bred to come spring and some in the fall.-St. Louis Republic.

A Simple Remedy.

The readiness of some people to send for a man to do those little things about the house which the smallest amount of enterprise or ingenuity would enable them to do for themselves is illustrated by an incident reported in the Chicago Tribune of a family named Chuckster.

They had bought some new gas burners with mantles. For a week or two the light was satisfactory; then it grew dim and dimmer until Mrs. Chuckster sent for the gas fitter.

"It grows worse all the time," she explained.

"When was it put in?" asked the man.

"About a month ago." "Ah, yes; I see." Then he lifted the chimney off, took it out to the kitchen, washed it with soap and water, and the light burned

as brightly as ever. "Fifty cents," said the man.

An Argument For Social Frankness. It is best to be sincere, as a family in Germantown recently found out. They had been entertaining a distinguished novelist from abroad who was not altogether acquainted with society's way of saying things it does not mean. The time came for her departure, and as the host was handing her to the carriage he said very courteously, "I am sorry you cannot stay longer."

To which came the unlooked for retort, "Oh, but I can!"

There was only one course open. The trunks were taken down, the carriage sent away, and, to the consternation of her hosts, the lady re-entered the house.-Philadelphia Times.

Red Snow.

In the arctic regions early explorers were astounded to find large areas of red snow, but the phenomenon is now familiar to men of science, who know that red snow, like a green garden fence, is due to the presence of unicellular algre, the only difference being in the coloring matter of the protoplasm. It is said that acres of snow are frequently covered in a single night by these tiny plants .- Good Words.

The Climate. "Don't you think you have a very

changeable climate?" said the stranger. "No," said the native. "It changes fast enough when it's pleasant, but when it's disagreeable it hangs on like grim death."-Washington Star.
