#### DONOTHING DOCTRINE.

That's the doctrine of a great many indolent people. They say "it will go away after a bit" when cautioned to "do omething" for their ailment imagine a farmer looking over the fence at the sprenting weeds in his corn and saying "they'll go away after a bit." Forest fires in Wyoming are spreading Diseases are like weeds. All they ask is neglect and they will grow and flour-ish. Neglect the first symptoms of dis-ease of the stomach and it will not be long before other organs are involved, because every organ of the body is dependent on the domach and its allied organs for nutrition. When the stomach and other organs of digestion and nutrition are diseased the food eaten is not perfectly digested and assimilated Hence there is a loss of nutrition by the body; a loss which shows itself in loss of flesh, and reduced weight, and that loss of nutrition is shared by every organ of the body, heart, lungs, liver, kidneys, As a consequence when the stomach is disease, the heart is liable to be involved, or the lungs, kidneys or liver. These facts emphasize the danger of neglect of what is popularly termed "stomach tro-ble."
