PROVERBS

"When the butter won't come put a penny in the churn," is an old time dairy proverb. It often seems to work though no one has ever told why.

When mothers are worried because the children do not gain strength and flesh we say give them Scott's Emulsion.

It is like the penny in the milk because it works and because there is something astonishing about it.

Scott's Emulsion is simply a milk of pure cod liver oil with some hypophosphites especially prepared for delicate stomachs.

Children take to it naturally because they like the taste and the remedy takes just as naturally to the children because it is so perfectly adapted to their wants.

For all weak and pale and thin children Scott's Emulsion is the most satisfactory treatment.

We will send you the penny, i. e., a sample free. Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE, Chemists, 409 Pearl St., N. Y. 50c. and \$1.00; all druggists.

STARTLED

By some sudden sound, she drops the vase upon the floor. She is nervous and may be told that nervousness is a luxury which only rich women can afford to indulge in. Nervousness has cost many a woman her position. Sometimes when women run machinery the price of nervousness is mutilation.—a finger lost or perhaps the whole hand crushed.

Nervousness in women is commonly but a symptom of womanly disease. It is useless in such cases to "doctor" for the nerves alone. Cure the diseases which attack the delicate womanly organism and nervousness will be cured also.

Dr. Pierce's Favorite Prescription makes weak women strong, sick women well. It establishes regularity, dries weakening drains, heads indigestion and ulceration, and cures female weakness. It tranquilizes the nerves and induces refreshing sleep.

"In the fall of 1901, I was troubled with nervous headache, most trouble and female weakness," writes Miss Hannah M. Beatty, of Salt, Oregon, U. S. "Last summer I wrote you and you advised me to try your 'Favorite Prescription' and 'Golden Medical Discovery.' I did so and began to improve rapidly.
