Deafness Cannot be Cured by local applications, as they cannot reach the diseased portions of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO. Toledo, O. Sold by druggists, 75c. Hall's Family Pills are the best.

The Advance in Paper Making. When Ulman Stromer long ago established paper making in Germany, he had no foresight of the important position paper was destined to assume in the civilization of man. In Stromer's time paper was a rare material, little used and only to be found in the offices of the learned, of scribes and of officers. The supply of Germany and of all northern Europe was brought from Italy and Spain—most of it from the factories of Fabriano, in Italy, where paper mills existed in the twelfth century, while a lively paper industry flourished in Spain, with its principle seat at San Felipe, in Valencia, as early as 1150.

The paper making art was introduced into both of these lands by the Arabs who learned it in Samarcand and spread it through Europe. It was introduced into Samarcand in 751 by Chinese prisoners from their country where it had been carried on from extremely ancient times.

A Snake Story From India. A queer story of the cure of a snake bite comes from India. A young man bitten by a venomous snake was evidently dying. The mob called in resolved to try the most powerful remedy he knew. He tied a cowrie shell on to a piece of string and muttered incantations till it began to whirl round and round and finally disappeared. In a few minutes the snake that had done the damage appeared with the string and shell round its neck and was commanded by the mob to put its mouth to the wound for about ten minutes, after which it went away. The dying man speedily recovered.

The British Seas. The seas around the coast of the British Isles are mostly narrow. The greatest width of the English channel is between Portland Bill and St. Malo, 140 miles. It narrows to 20 1/2 miles at one point in the strait of Dover. The distance between Great Britain and Ireland is even less. Tor Head is only twelve miles from the nearest point of the Mull of Cantire. Between Carnore Point and St. David's Head, in Wales, forty-seven miles is the least breadth of water.

Well Guarded. "That's a handsome office clock of yours. Aren't you afraid it'll be stolen?" "Never. Why, every clerk in my employ has one eye on it all day."—New York World.

Limited Experience. The Widow—I suppose you are familiar with warfare in all its various forms, major? The Major—Not all, madam; not all. I am still in the bachelor ranks.—Exchange.

The Voice of Experience. Singleton—The woman I marry must be an ideal housekeeper. Wederly (with a sigh)—Take my tip, old man, and freeze on to a practical one.—Chicago News.
