For Young Men and Young Women. There is nothing that will arouse the ire of a young man or woman so quick as to have inferior laundry work put off on them. They may dress ever so well, but if their shirt front or shirt waist is mussed, their neat appearance is spoiled. The Troy Laundry makes a specialty of ladies' and gentlemen's fine work. There can be no better work than is done at the Troy. Leave your orders at Johnson's barber shop.

THE LOCAL NEWS. An 11 pound boy was born Wednesday, August 19, at the home of Rev. and Mrs. J. H. Beaven.

The Salvation Army. Major John Millsaps will be with us, Tuesday and Wednesday, 25-26, of August. One evening he will deliver his popular lecture, "With the Americans in the Philippines." Major Millsaps is one of the ablest American officers in the Salvation Army, having served 19 years. He has an international reputation as the editor of the California War Cry, which he edited for many years. He also accompanied General Merritt and the United States forces to the Philippines as the Salvation Army's representative. He lay in the trenches, stood on the firing line, nursed the sick and prayed with the dying. He is familiar with the early days in the Rockies and California. All come praying. ENSIGN W. R. CHARTRE.

Deadly Prussic Acid. Prussic acid is composed of such things as animal refuse and blood solids, with large quantities of oil of vitriol. Even the smallest of the acid produces pain in the throat and in the region of the heart, and there are few poisons for which there is such little opportunity for an antidote. If there is time—and there seldom is, for the poison is almost instantaneous in its action—stimulation induced very freely may give relief and reduce the absolute certainty of death to a grave probability.

A TRICK OF HAYDN.

The Note That Mozart Thought It Was Impossible to Play. Haydn and Mozart were great friends. When either had composed a masterpiece the other was invited to the house of the composer to enjoy the first sweetness. It chanced to be Haydn's turn, and Mozart came full of expectation. Contrary to custom, Haydn invited his guest to give his interpretation of the theme instead of playing it over himself. Much pleased at the compliment, Mozart played brilliantly, for the work was beautiful and his musician's soul was stirred.

Suddenly he halted and looked across the piano at his friend. "There's a mistake here," he said. "A passage written for three hands would be impossible for a soloist. Of course those notes must come out."

"Oh," said Haydn quietly, "I can play it."

"Perhaps not," answered Haydn. "Nevertheless I contend that I can play the passage. I would not have written it otherwise."

"A challenge!" cried Mozart. "Prove your word." And he yielded his place at the piano.

His excitement rose as Haydn reached the disputed passage, when, to his amazement, the composer brought his nose to the keyboard, and the notes rang out clear and true.

THE ORdeal OF Boiling Oil. In Ceylon the system of "witch finding" is both unique and terrible. Some oil from newly gathered king coconuts is manufactured by one of the friends of the complainant. This is poured into a primitive stone vessel and heated to the boiling point. Each of the suspected witches is then brought upon the scene and is then and there compelled to dip three fingers of the right hand into the seething caldron, each having a right under her ideas of justice to throw the oil remaining upon her fingers into the face of the complainant, who stands near by.

While this ordeal is being undergone a single exclamation of pain on the part of the suspected person is construed to be an admission of guilt. If no such exclamation is made the innocence of the accused is supposed to be established. It is said that every tenth person on the island of Ceylon has maimed fingers as a result of having met the "ordeal of boiling oil."

Swimming "Sailor Fashion." It was a reheaded boy from across the tracks on his good behavior at the swimming hole above the dam that I first saw swim hand over hand, or "sailor fashion," as we called it, rightly or wrongly I know not. I can hear now the crisp, staccato little smack his hand gave the water as he reached forward.

It has ever since been my envy and despair. It is so knowing, so "sporty." I class it with being able to wear a pink barred shirt front with a diamond clinker pin in it, with being genuinely fond of horse racing, with being a first class poker player, with being delighted with the company of actors—what wouldn't I give if I could be like that? My life has been a sad one, but I might find some comfort in it yet if I could only get that nifty little spat on the water when I lunge forward swimming overhand.—McClure's.

Animal Longevity. Some curious statistics have been published upon what an insurance actuary would describe as the "expectation of life" in animals. Among the larger species of cattle there is some approach to uniformity. Thus for the horse and the ass the extreme limit is about thirty-five years and for horned cattle about thirty. For the dog it is given as twenty-five, while sheep, goats, pigs and cats are grouped at fifteen. But there are stranger disparities among birds. While a goose may live thirty years, a sparrow twenty-five and a crow as many as 100, ducks, poultry and turkeys die of old age at twelve years. The palm for longevity is divided between elephant and parrot. Both pass the century.

The Pangs of Hunger. At the dinner table Robert ate himself into a state of great satisfaction, while his relatives stared in wonder. At last he was actually forbidden to eat any more. On the way home he pulled something from his pocket and began gnawing it.

"What is that?" asked his mother. "It's only dog biscuit," said Robert apologetically.

"Where did you get it?" "Well," said Robert, "I knew I should be hungry before I got home, so I took it away from Fido."—Philadelphia Record.

Fitting the House to the Carpet. Among the many ideas which the Japanese have copied from western customs and remodeled to suit themselves is the covering of their floors with a special kind of matting. The standard size of a mat is 3 by 6 yards. The custom of using these mats is so general that when building the Japanese architect arranges the size of the rooms to fit the mats, and when renting a house the size of a room is stated as requiring one, two or three mats, as the case may be.

Acting Versus Drawing. To a group of friends Ellen Terry once said: "Acting is not like drawing. You make a line. If it is wrong, you rub it out at once and make another. With acting that is impossible. There is no altering—it must stand. I often feel as if I must cry to the audience, 'Oh, that is wrong, not as I meant it to be; let me act that part or sentence over again.'"

"Such a Noise!"

The mother says to herself sometimes, "I can hardly endure it." Then a chill creeps over her as she thinks of the awful silence which falls upon the home when children are taken away, and she is glad her children are hardy of body and lusty of lungs.

When a child does not enjoy noisy sports and games there is something wrong, and that something will often be found to be a lack of nutrition adequate to the needs of youth and growth. The stomach is "weak," digestion is imperfect, and so the nourishment of the body is inadequate.

In such cases Dr. Pierce's Golden Medical Discovery works wonders. It changes puny, fretful children into healthy, happy girls and boys. The process by which this change is accomplished is strictly along the lines marked by Nature. All growth and strength come from food when it has been digested, converted into nutrition and assimilated. "Golden Medical Discovery" cures diseases of the stomach and other organs of digestion and nutrition, and so enables the body to obtain without loss or waste the benefit of the nutrition provided in food. The "Discovery" contains no alcohol and is entirely free from opium, cocaine and all other narcotics.

A Wonderful Thing. "I have been thinking of writing to you for some time," writes Mrs. W. D. Benson, of Maxton, Robeson Co., N. C. "to let you know what a wonderful thing Dr. Pierce's Golden Medical Discovery did for my little boy. He was taken with indigestion when he was a year and a half and he was under the doctor's treatment for five long years. We spent all we made for doctor's bills, and it did no good. He could eat only a little milk and cracker, and some times even this would make him sick. He could not sit up all day, and I gave up all hope of his ever getting any better. Three years ago I found one of your books, and on looking it over one day I noticed Dr. Pierce's Golden Medical Discovery recommended for indigestion. We bought some and gave it to our boy. He had been treated at Hoods by a good doctor and at Bennettsville, S. C., and at Currie and Lumberton and Maxton, and was only relieved for a short time. We gave him two bottles of Dr. Pierce's Golden Medical Discovery and it cured him. He is well as can be and can eat anything that he wants and it does not hurt him. He has not been sick a day since and it has been three years since he took your medicine."

A Thankful Mother. "I have felt it my duty for a long time," writes Mrs. Mollie Jones, of Gap, Comanche Co., Texas, "to tell you of the wonderful cure effected by your 'Golden Medical Discovery' and 'Pleasant Pellets' in the case of our little boy, now nearly seven years old. When he was two months old he was taken with La Grippe, and it settled on his lungs and in his throat. His tonsils enlarged, and when he was two years old we had the doctor operate on them. When we had the doctor look at his tonsils and he made a bad work of it. If he went in the wind he would be sick, and we tried everything we could hear of and consulted every physician we saw, but they did not know what to do. When he was nearly six years old (in October, 1898) he was worse than ever, and I could not rest for being so uneasy about him. He was our fourth boy (the other three were dead), and it seemed to me that if he died I just could not bear it. I would go to sleep crying and begging God to spare him. Well, I could see he was getting so much worse; he was just as poor as he could be, and his kidneys had been troublesome all his life. I had read a book about Dr. Pierce's medicine. It seemed to me that this was the very medicine we wanted, and I told my husband that if he would buy some of Dr. Pierce's medicine I felt almost sure it would help our boy. He sent and got some and we commenced with the 'Golden Medical Discovery' on Friday night, and with the 'Pellets' the next morning. We gave him your medicine three times a day and by Sunday he was able to play, and in one month from the time he commenced taking it he had gained six pounds and his cough was all gone. He has not coughed any since and he does not take cold any more than the rest of us. He goes about like the rest of the children and plays in the cold and hot weather."

Dr. Pierce's Common Sense Medical Adviser in paper covers is sent free on receipt of 21 one-cent stamps to pay expense of mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.
