Things are progressing nicely in Sandy. The fair weather of the past two weeks has advanced all farm work very much. Potato digging is complete. The crop is very good. Some complaint of blight having effected the potatoes.

Albon Meinig, vice-president of the Cheney Creek Mining Co., brought a load of ore from the mines guarded by three heavy armed men. Some people are wondering what it all meant but it is supposed these men were stranded hunters from the hills.

The whistle and roar of the O. W. P. & R. R. cars can be heard bringing new life and activity in to this already progressive Sandy country. Sandy is now a great lumber center and soon thousands of cord-wood will be shipped and car loads of farm produce will now find a way to market by O. W. P. Ry. It is five miles to Boring the nearest station and an effort will be made to have a branch line built to Sandy, as the ever increasing farm products and great natural resources will demand railway connection.

Not only is Sandy a lumber center but it is actually slow but sure becoming a mining center beside a commercial distributing point for a very large surrounding country. The Cheney Creek gold field located above Sandy near Salmon river are proving to be most valuable digging. Ore taken lately assayed \$83 per ton. Some specimens went enormously rich. A company now is running a tunnel with a distance now of 225 feet and the ore shows up better as the tunnel advances. Over a hundred claims have been staked the past year and great things are yet to be heard from these mines. Ned Nelson, an expert miner of Colorado, pronounced the Cheney Creek mines as first class prospects. Chas. Peshall who is developing his mining property is jubilant over rich strikes he lately made and would not part with it for love or money.

H. H. Anders who got both legs broken is reported as getting on nicely. The neighbors had a bee and dug and housed Mrs. Anders potatoes also cut and housed her some wood. The Garfield farmers are not well pleased at taking their hard earned honors and ascribing them to Cazadero. The car load of prunes thus rannered were raised and dried in Garfield not Cazadero. A pretty way to gain notoriety taking Garfield's products to blow their horn with. We think it an out right injustice to we prune producers.

Quite a number of men of families are quite indignant at their wives because the said men are not very good stove wood providers and thereby suspect the women in general of sending a petition to the O. W. P. R. R. freight manager to request wood for shipping so the said women could have wood to use. So gentlemen do not feel hurt if you are used a little slightly by the said farmers. Just think he did not get his wife wood and go on.

Mr. Larson says: "I am favored with the custom of farmers within a radius of 20 miles, many of whom I have supplied Chamberlain's remedies. All testify to their value in a household where a doctor's advice is almost out of the question. Within one mile of my store the population is perhaps sixty.
