What is Life?

In the last analysis nobody knows, but we do know that it is under strict law. Abuse that law even slightly, pain results. HEALTH

"I don't think we could keep house without Theodor's Black-Draught. We have used it in the family for over two years with the best of results. I have not had a doctor in the house for that length of time. It is a doctor in itself and always ready to make a person well and happy."—JAMES HALL, Jacksonville, Ill.

Because this great medicine relieves stomach pains, frees the constipated bowels and invigorates the torpid liver and weakens kidneys.

No Doctor

is necessary in the home where Theodor's Black-Draught is kept. Families living in the country, miles from any physician, have been kept in health for years with this medicine as their only doctor. Theodor's Black-Draught cures biliousness, dyspepsia, colds, chills and fever, bad blood, headaches, diarrhoea, constipation, colic and almost every other ailment because the stomach, bowels, liver and kidneys so nearly control the health.

The Twentieth Century Grange held its regular meeting Saturday evening, Feb. 27. A good crowd was present and a very pleasant evening was enjoyed by all. Proper Treatment of Pneumonia.

Pneumonia is too dangerous a disease for any one to attempt to doctor himself, although he may have the proper treatment at hand. A physician should always be called. It should be borne in mind, however, that pneumonia always results from a cold or from an attack of the grip, and that by giving Chamberlain's Cough Remedy the threatened attack of pneumonia may be ward off. This remedy is also used by physicians in the treatment of pneumonia with the best results. Dr. W. J. Smith of Sanders, Ala., who is also a druggist, says: "I have been selling Chamberlain's Cough Remedy and prescribing it in my practice for the past six years. This looks quite encouraging for the young ladies to see two bachelors do this well. Messrs. Jones and Rhees have improved the place very much and it looks a great deal different than it did when the former owners ran it. They were in town this week and disposed of several hogs and beef steers, six tons of oats, 150 sacks of potatoes and several other products, which they raised. Although the two bachelors seem very bright in managing their farm, they are not so bright in trimming maple shade trees, as they seem to be a little lopsided, and we hope that they will do a little better on the fruit trees.

Mackaburg.

And still it rains. The roads are getting impassable. Loads of potatoes get mired and have to be dug out. We have one half mile of road right in this burg that is a disgrace to Oregon. Last year our economical county court allowed this road district the large sum of \$100 and this precinct pays about the heaviest tax of any in the county. But as it is not necessary to build roads leading to Oregon City so it is all given to Oregon City to hold the Viola and Springwater trade. We don't ask the rest of the county to build our roads but we would like to have what belongs to us.

The dancing school still holds forth at the K. O. T. M. hall. A little more interesting than usual last Tuesday night.

We have but one teacher in our school now as Rev. Merty's permit was revoked by county superintendent.

A number of Mackabees and neighbors turned out and sawed wood for Henry Bruch, who is under the doctor's care.

C. Maguina, who lives two miles south was kicked by a horse last Saturday night and very seriously injured.

Our rural mail carriers have a hard time these days. They rarely earn their money. Looks as if rural delivery was a failure in Oregon in the rainy season.

Born to Mr. and Mrs. J. W. Barksdale a daughter Feb. 27th.

Farmers are looking for sunshine as feed is getting scarce and hay is worth eight and nine dollars per ton in the barn.

Brown, of Leesville, Ind., endured death's agonies from asthma; but this wonderful medicine gave instant relief and soon cured him. He writes: "I now sleep soundly every night." Like marvelous cures of Consumption, Pneumonia, Bronchitis, Croup, Colds and Grip prove its matchless merit for all Throat and Lung troubles. Guaranteed bottles 50c and \$1. Trial bottles free at Charman & Co. drug store.

Acute Vision of Birds.

Birds have very acute vision—perhaps the most acute of any creature—and the sense is almost more widely diffused over the retina than is the case with man; consequently a bird can see objects sideways as well as in front of it. A bird sees—showing great uneasiness in consequence—a hawk long before it is visible to man. So, too, fowls and pigeons find minute scraps of food distinguishing them from what appear to us exactly similar pieces of earth or gravel. Young chickens are able to find their own food, knowing its position and how distant it is as soon as they are hatched, whereas a child only very gradually learns either to see or to understand the distance of an object. Several birds—apparently the young of all those that nest on the ground—can see quite well directly they come out of the shell, but the young of birds that nest in trees or on rocks are born blind and have to be fed.—Chambers' Journal.

President For a Day.

David R. Atchison of Missouri had the unique honor of being president of the United States for one day, and that was Sunday, March 4, 1849. The term of James K. Polk expired on the morning of that day, but, as it was Sunday the president elect, General Zachary Taylor, was not inaugurated until next day, March 5. In consequence the president pro tem. of the United States senate, D. R. Atchison, was the acting president on March 4, 1849. However he had presided at a night session of the senate, which lasted until away after midnight of Saturday, and he slept nearly all day Sunday, without realizing the fact that he was president of the United States.

Light Lunch and Music.

A country girl in Dublin went into a restaurant for her lunch. She was asked if she would have a meat dinner or "light lunch and music." Being curious, she chose the light lunch and music and was immediately shown into a room where other inquisitive persons were eating soup and listening to a spirited if not satisfying performance upon the jewsharp by one of the waiters. She felt at the end of the meal that she had paid high for curiosity but she could make no complaint.

Grottesque.

Irate Husband—If I'm to believe what you say, why on earth did you marry me, madam?

Wife—I remember, I had at the time quite a craze for collecting grottesque curios—Chinese and Japanese hobgoblins and such like—and you were the only man to match my collection.

A Real Absent Minded Man.

The most absent minded man was not the man who hunted for his pipe when it was between his teeth, nor the man who threw his hat out of the window and tried to hang his cigar on the peg—no, but the man who put his umbrella to bed and went and stood behind the door.—Exchange.

Bumps Into Them.

Towns—I believe I'm a sort of owl or something. I can usually find anything I'm looking for in the dark.

Browne—I must be a sort of elephant or something. I usually find everything I'm not looking for in the dark.—Louisville Courier-Journal.
