The unfortunate young man who was drowned near Oswego was buried in what is known as the Papenburg burying ground on Sunday p. m. He leaves a widow but no children, we believe. Her maiden name was Mary Boberg and she lived near Wilsonville. We hear that she is left in comfortable circumstances, financially, as he was insured to the amount of \$6000. It appears that he was subject to epileptic fits, as he had a number while hunting or fishing, of which aport he was very fond, but always be-fore companions were with him who worked over him till they brought him back to life, and it is supposed that he was taken with one of them and fell face down in the water unable to help self, as there was no water in his lungs, showing that he did not die by drowning. He was 41 years old.

Mrs. Beible, accompanied by Miss Ida Slicksser, drove to town with a load of potatoes Saturday and sold them for \$1.25 per sack.

The past week has been cool, blustery, rainy, and Friday night there was quite a frost. We cannot tell yet if it has injured fruit or not.

Don't plant silver mapies. They are nice looking, trim-built trees, taking on naturally a pretty shape, and when in full leaf with their ceasiess rnetling and whispering they remind one of the sepen, a very companionable tree but when a few years old they begin to be aggressive and take the ground, sending up shoots in every inconvenient place, catching the plow for rode around, and in the fall shedding such a mass of leaves. So don't plant silver maples, unless on the other man's back forty or on a timber claim in

Speed of Birds.

Frequently arguments arise as to the speed with which wild birds fly, and many men of science have sought to determine something about it. Naturally it is impossible to fix the record made by such birds as grouse, quail and snipe when they first arise, but it is safe to say that they are not going onehalf as fast as the luckless gunner who misses them imagines. With the migratory fowls of known fast flight, such as ducks and geese, something more nearly accurate is known. The green winged teal is about the speediest of them all. It does something like minety miles an hour as readily as a sparrow dives into an inviting rainspout. The canvasback is only a trifle slower, probably eighty-five miles being its limit, while the black duck, mallard and redhead fall below this, being timed at about eighty miles. Still this is plenty fast enough to insure lots of misses unless the fellow with the gun looks down the rib straight and pulls the trigger at the right time.
