You might comment on the fact that the tax levy for Clackamas county for the year 1904 is 2 1/2 mills less than that of any other county in the state," remarked County Judge Ryan Tuesday. Reference to the reports from the other counties of the state confirms this statement. The levy in this county is even 2 1/2 mills less than that of Marion county—of which much has been said because of the fact that the county is not only entirely out of debt, but has a substantial cash balance in the treasury. The increased levy of Marion county was made in order to raise more money for the general expenses of the county. In this county it will be observed that the levy for general county purposes is 1/2 of a mill less than the levy of a year ago.
