Deserves Your Patronage.

The growth of a community and the is well enough to preach "patronize home industry" but except the service given at a home institution equals that of outof-town enterprises, this argument carries no weight and is entirely disregarded, as it should be. But with Oregon City people it is different. A few months ago E L. Johnson established the Cascade Laundry. It is equipped with the latest improved machinery and is daily turning out work that is equal to any and superior to much of the laundry work that is being done in Portland. Being a home institution and furnishing employment for many Oregon City people it is enjoying an immense patronage. The high standard of the work being fone commends it to the general public Laundry left at the O. K. barber shop will be promptly called for and delivered to any part of the city. Telephone 1204. E. In the morning the stomach contains a considerable quantity of mucus, spread over and adherent to its walls. If food enters at this time the tenacious mucus will interfere to some extent with the direct contact between the food and the stomach necessary to provoke the secretion of gastric juice. A glass of water taken before breakfast passes through the stomach into the small intestines in a continuous and uninterrupted flow. It partially distends the stomach; it thins and washes out most of the tenacious mucus; it increases the fullness of the capillaries of the stomach directly if the water is warm and indirectly in a reactionary way if it is cold. Care must be taken not to take cold water when the circulation, either local or general, is so feeble as to make reaction improbable. We should not risk it in an advanced age nor in the feeble, whether old or young, nor should it be taken in local troubles like gastric catarrh.
