Bright's Disease

Not Rare, but Common—Kidney Disease Develops into Bright's Disease the 8th to 10th Month; Then Incurable by All Known Means Except the New Fulton Compounds, which Record 87% of Recoveries.

We have before us a little work on kidney diseases by Joseph F. Edwards, M. D., of Philadelphia, that contains some things that everyone ought to know. Many people imagine Bright's Disease is rare when, in fact, it covers nearly the whole gamut of kidney diseases. This book sets out that the kidneys have but one function, viz., the elimination of the urea and waste products, and that all interferences with that function are called Bright's Disease. Dr. Edwards adds: "For the benefit of physicians who may read this book I will give a list of the cases which I attribute to Bright's Disease, viz.:

Albuminuria.
Congestion of the Kidney.
Degeneration of the Kidney.
Fatty Degeneration of the Kidney.
Inflammation of the Kidney.
Uraemia.
Disease of the Kidney."
Thus nearly all kidney disease being Bright's Disease, the serious question is, is it in the primary or secondary stage? After the eighth to tenth month it becomes chronic and is then incurable by all known means except the Fulton Compounds. There is often no notice of the trouble till it has fastened. If you have kidney disease in the first stage the Renal Compound will cure it quickly. If it is of more than 8 to 10 months standing it is the only thing known that will cure it. In proof that nothing else will we cite all medical works in evidence. The stockholders of the John J. Fulton Co., business and professional men of San Francisco, are the first in the world to announce the cure, presenting a definite percentage of recoveries (87 per cent), and giving out the lists of the cured, all among purely chronic, well-defined cases. If you have any kind of kidney trouble, there is only one thing to take. The Renal Compound for Bright's Disease is \$1; for Diabetes, \$1.50. John J. Fulton Co., 400 Washington street, San Francisco, sole compounders. Pamphlet free. We are the sole agents.

Millions and Millions.

Dr. Washburn, of Minneapolis, says the people of this country pay \$80,000,000 less a year for medical attendance than they did ten years ago, and live on an average of ten years longer. It will take that extra \$80,000,000 to live the extra ten years; so where's the gain?

Old Enough to Notice.

"No," replied little Marguerite; "one of them may be here, but they never are both at home at the same time."
