Bright's Disease

Not Rare, but Common--Kidney Disease Develops into Bright's Disease the 8th to 10th Month; Then Incurable by All Known Means Except the new Fulton Compound, which Record 87% of Recoveries.

We have before us a little work on kidney diseases by Joseph F. Edwards, M. D., of Philadelphia, that contains some things that everyone ought to know. Many people imagine Bright's Disease is rare, when, in fact it covers nearly the whole gamut of kidney diseases. This book sets out that the kidneys have but one function, viz., the elimination of the urea and waste products, and that all interferences with that function are called Bright's Disease.

Albumenuria. Congestion of the Kidney. Degeneration of the Kidney. Fatty Degeneration of the Kidney. Induration of the Kidney. Uremia. Disease of the Kidney. Thus nearly all kidney disease being Bright's Disease, the serious question is, is it in the primary or secondary stage? After the eighth to tenth month it becomes chronic and is then incurable by all known means except the Fulton Compound. There is often no notice of the trouble till it has fastened. If you have kidney disease in the first stage the Renal Compound will cure it quickly. If it is of more than 3 to 10 months standing it is the only thing known that will cure it. In proof that nothing else will we cite all medical works in evidence. The stockholders of the John J. Fulton Co., business and professional men of San Francisco, are the first in the world to announce the cure, presenting a genuine percentage of recoveries (87 per cent), and giving out the list of the cured, all among purely chronic, well-defined cases. If you have any kind of kidney trouble, there is only one thing to do. The Renal Compound for Bright's Disease is 87 for Diabetes, 81.33, John J. Fulton Co., 409 Washington street, San Francisco, sole compounders. Pamphlets free. We are the sole agents.
