E. P. Smith, the nurseryman of Gresham, Oregon, a number of years ago sent to Ohio for scions of a new pear named the Gans. He top-worked a tree with se scions, and the tree is now bearing freely. > Property Owners Fight Flames-W. H. Latourette, of McMinnville, was in the city the latter part of last week and while here assisted a number of the farmers of the Maple Lane district in fighting a fire on the Shortridge property that threatened to do considerable damage to surrounding property. The fire was fought all night before it was finally placed under control. D. R. Dimick, of Canby, was in the city Saturday and reported the buring of a valuable barn on the farm of Thos. Blanchard at Central Point the day before. Mr. Blanchard's residence and other buildings were only saved by the vigorous work of the threshing crew. The fire was started by a spark from a threshing machine engine. The fire that raged for several hours at Gladstone, threatened the park and the Chautauqua buildings, was extinguished after several hours of hard fighting in which the major part of the population of that suburb participated.

Might Have Been a Hold-Up-While returning from a trip to Cane mah late Saturday evening where he had been delivering laundry. Carl Nehren considers that he narrowly escaped be ing held up, and attributes the fact that he was not largely to the fleetness of the horse that he was driving. Carl drives the delivery wagon for the Cascade Laundry and in the making of deliveries on Saturdays is supposed to make ome collections which is though to have rompted the stranger to intercept him. While driving down the plank road, a man jumped from beneath the railroad trestle and commanded young Nehren to stop but instead of doing so the lad applied the whip to the animal he was driving and, dashing by the unwelcome quaintance was soon out of danger. Carl has had a great fondness for Canemah for some time, but his experience of Saturday night is apt to cause the young man to confine his visitations to such

Are Opposed to Fusion-

Clackamas county held at Knapp's hall in this city Sunday afternoon, the members of that organization by unanimous vote sustained the action of the executive committee of the national organization in causing the expulsion of Victor L. Berger, of Milwaukee, Wisconsin, who was charged with advocating fusion. It is charged against Berger that at a recent municipal election at Milwaukee he while serving as precinct committeeman for the Socialists, suggested and worked for a consolidation of the Socialists and the Democrats to the end that the Republican nominee for municipal judge might be defeated. The fact that the Democratic candidate was a strong anti-Socialist man only the more incensed the nembers of the party with the action of Berger. The unanimity of sentiment on the question that was disclosed at Sunday's meeting, does not indicate any probability of a fusion of the Socialists n this county with any other political organization.

CASTORIA For Infants and Children. The Kind You Have Always Bought GENERAL SUMMARY.

No precipitation of consequence ocurred throughout the State during the last week and all late crops with the exception of corn and hops, are in need of good soaking rain. Light forst occurred Thursday morning on some of the bottom lands in Southern Oregon, but no damage resulted therefrom.

Thrashing is practically completed in Western Oregon cade Mountains this work continues un der favorable circumstances. The yield of both wheat and barley continues good in the Columbia and Grande Ronde Vallevs, but in the Wilamette Valley and Southern Oregon, the grain yields were generally below the average.

Hops made satisfactory advancement and the crop is about ready for harvesting; picking will become general by the first of next week.. The vines are free of vermin and it is expected the quality will be good. Corn is doing nicely and a large crop is promised. Field onlons are being pulled. Late potatoes and gardens are doing poorly owing to lack of rain. Pears and prunes are ripe and being

gathered. Pears are abundant, but the prunes will average about half a full crop. Apples are small in size and in well kept orchards an average crop will be harvested. Stock on the ranges continue in fair-

good condition; in the dairy districts cattle are losing ffesh and there is a marked falling off in the milk supply.
