## "HERE IS THE TRAIL."

Signs Used by Indian Tribes and  
White Hunters.

First among the trail signs that are  
used by Indians and white hunters  
and most likely to be of use to the  
traveler, says a writer in Country Life  
In America, are ax blazes on trees,  
trunks. These may vary greatly with  
locality, but there is one everywhere in  
use with scarcely any variation. This  
is simply the white spot nicked off by  
knife or ax and meaning, "Here is the  
trail."

The Ojibways and other woodland  
tribes use twigs for a great many  
signs. The hanging broken twig, like  
the simple blaze, means, "This is the  
trail." The twig clean broken off and  
laid on the ground across the line  
of march means, "Break from your  
straight course and go in the line of the  
butt end," and when an especial warn-  
ing is meant the butt is pointed toward  
the one following the trail and raised  
somewhat in a forked twig. If the butt  
of the twig were raised and pointing to  
the left it would mean, "Look out,  
camp," or "Ourselves or the enemy or  
the game we have killed is out that  
way."
