Sprague, every ingredient entering into the make-up of Dr. Pierce's Golden Med- Mrs. Valentine, ical Discovery, the famous stomach tonic, liver invigorator, heart tonic Mrs. and regulator and blood cleanser. This is also equally true of Dr Brunswick Restaurant, Pierce's Favorite Prescription, for the cure of all those weaknesses Mr. Copeland, Mrs. C. Ford, and distressing ailments peculiar to women. No other medicines sold through druggists for domestic use, can show any such professional endorsement. Dr. Pierce's above mentioned remedies are non-alcoholic and non-secret, all their ingredients being printed on each bottle wrapper. They occupy a unique position and are INA CLASS ALL BY THEMSELVES. They are neither secret nor patent medicines. They are powerful to cure but safe to use in any condition of the system, even for the most delicate women and children.

Pure, tripple refined glycerine, which is used instead of alcohol both for extracting and preserving the active, medicinal principles from the roots of the several American forest plants entering into Doctor Pierce's medicines, is much able features inherent in alcohol, inasmuch as it produces only salutary influences upon the system, while alcohol, even in moderate portions, if long continued, as in the treatment of obstinate aliments, is very injurious and often beggets a craving for stimulants. Furthermore, and the produces only salutary influences are recommended as remembered to the cure of all chronic, lass much as it produces only salutary influences upon the system, while alcohol, even in moderate portions, if long continued, as in the treatment of obstinate aliments, is very injurious and often beggets a craving for stimulants. combined in sten proportions that each enhances the curative action of all the others.

The "Discovery" must not be expected to produce miracles. While it is especially suited for the cure of all chronic, lingering coughs that are curable, it is not so effective in meant colds and coughs unless slippery elm mucilage, flaxseed to sustion of gum arabic, or other mucilaginous demulcent be drank freely in connection with its use. Nor must the "Golden Medical Discovery" be expected to cure consumption in its advanced stages. In its early stages it will stay its progress and often effect a cure if its use be persisted in for a reasonable length of time. Send for the little book noted above and learn what those most the ingredients out of which Dr. Pierce's medicines are made and thereby learn what they cure obstinate diseases. tinued, as in the treatment of obstinate ailments, is very injurious and often begets a craving for stimulants. Furthermore, glycerine itself is a most valuable curative agent instead of being a harmful habit-forming agent like alcohol. Its nutritive properties, Dr. Pierce and many others eminent in the profession believe, far surpass those of cod liver oil, entitling it to favorable consideration as a remedy in all cases of incipient consumption, especially when Wm. Brobst, Com'r. Courier, Printing. medicines are made and thereby learn W. U. Tel., Insane, W. E. Carll, Insane,

sideration as a remedy in all cases of incipient consumption, especially when it is combined with the active medicinal principles extracted from Black Cherrybark, Queen's root, Stone root, Golden Seal root and Bloodroot, as in "Golden Medical Discovery."

Besides its superior nutritive properties, glycerine is a very valuable demulcent and thereby greatly enhances the remedial action of all the foregoing roots in the cure of severe coughs, bronchial, throat, laryngeal and other kindred affections of the air-passages and lungs. In all "wasting diseases," where there is loss of flesh and gradual "running down" of the system, the glycerine certainly plays an important part in lessening the breaking down and wasting of flesh, and in promoting assimilation and increase of bodily strength and weight. It is a powerful reconstructive agent in all cases of impolared vitality and especially valuable. medicines are made and thereby learn why they cure obstinate diseases.

By reading some of the extracts from eminent authorities contained in the little booklet mentioned above, treating of the several ingredients entering into "Golden Medical Discovery," it will be readily understood why this famous medicine cures obstinate kidney and bladder affections, chronic diarrhea, all catarrhal affections, no matter in what part of the system existing. By reason of the Stone root, and Golden Seal root contained in it, it is a most affective curative in valvular and other affections of the heart, as you will understand from the writings of Drs. Paine, Hale, Ellingwood and others, concerning Stone root, Golden Seal root and Black Cherrybark which are to be found in the little booklet above mentioned.

superior alteratives and tonics as in "Golden Medical Direcovery" and "Favor-ite Prescription." Its wonderful solvent properties also play an important part in the cure of gall stones and severe con-

when associated and combined with such superior alteratives and tonics as in "Golden Medical Direovery" and "Favorite Prescription." Its wonderful solvent properties also play an important part in the cure of gall stones and severe constitution.

Glycerine is also one of the very best anti-ferments and as such counteracts the excessive fermentation of foods in the stomach, present in most cases of indigestion or dyspepsia. Thus the pain, belching of noxious gas, bloating and other disagreeable symptoms are overcome and the Stone root, Golden Seal root, Bloodroot and other ingredients of "Golden Medical Discovery" are greatly assisted in their action in completing a cure.

As will be seen from the writings of Drs. Bartholow, King, Scudder, Hale, Wood, Hare, Johnson, Coe, Ellingwood and other high euthorities, as contained in the little book mentioned below, these agents can confidently be depended upon for the most positive, curative action in all atonic, or weak, states of the stomach, accompanied with distressing indigestion or dyspepsia and kindred resultant affective for the most positive, curative action in all atonic, or weak, states of the stomach, accompanied with distressing indigestion or dyspepsia and kindred resultant affective forms.
