HIGHLAND.

Division No. 9 of Beaver Creek Mutual Telephone Association, held a special meeting last Saturday night and Sunday morning at Fred Klebe's, January 27th, 1906. The meeting adjourned this time at about 2 o'clock a. m. Instead of 4 o'clock a. m. as formerly, quite a saving of time and improvement, we should judge.

This division certainly must have an enormous amount of business to transact or must be unruly and unmanageable or the officers must be incompetent and inefficient.

This time a new office was created and filled after considerable voting and declining, and many expressions of reluctance namely treasurer.

H. North was the fortunate and happy one that captured the port folio of the treasurer. Ere long every member in the division will hold an office and perhaps there will not be members sufficient and efficient to fill them.

The division recently created beyond No. 9 is making desperate efforts to construct their line in order to install their telephones so that they can listen to a little neighborhood gossip.

It must be remembered that the public highways at present are rather muddy, which would make visiting somewhat burdensome, hence a little gossip or social chat over the line is more genteel and congenial (ha ha ha).

The human family in this respect resembles a lot of sheep, wherever the bell sheep jumps, they will all jump or die in the attempt. So with this telephone project, whenever some visionary fellow or crank imagines he has as much business to tend to as some of our city merchants and starts a telephone project, the rest will follow suit, even if they have to borrow the money to pay for it with. And for what? Why they will tell you that some day in the distant future, say ten or twenty years hence; they might have an occasion to call a physician or surgeon, or something else, and to be prepared for the emergency they are constructing telephones now. It is rather an expensive luxury. Even Springwater, according to reports is

talking of crossing Clear Creek canyon to connect with Highland.

Another matter, Mr. Editor—The indifference, prejudice and ignorance concerning the new law known as the Direct Primary Nominating Elections Law and duties of citizenship is really appalling. The writer in his wanderings found one man that didn't know we were going to have a general biennial election, much less Primary Election. As time rolls on, we are more and more convinced that in order to have an intelligent ballot, we must have an educational qualification, and the elector who fails to prepare and qualify himself for that important duty, must be disfranchised.

Such a condition may be best and quickest relieved by Herbine the best liver regulator that the world has ever known. Mrs. D. W. Smith, writes, April 3, 02: "I use Herbine, and find it the best medicine for constipation and regulating the liver I ever used. 50 cents. Sold by Huntley Bros. Co."

CROUP.

Begins with the symptoms of a common cold; there is a chilliness, sneezing, sore throat, hot skin, quick pulse, hoarseness and impeded respiration. Give frequent small doses of Ballard's Horehound Syrup, (the child will cry for it) and at the first sign of a croupy cough apply frequently Ballard's Snow Liniment to the throat.

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores, as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When they are scrawny those nerves are hurt at every ungentle touch. They delight in Scott's Emulsion. It is as sweet as wholesome to them.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

COMMON COLDS ARE THE CAUSE OF MANY DISEASES.

Physicians who have gained a national reputation as analysts of the cause of various diseases, claim that if catching cold could be avoided a long list of dangerous ailments would never be heard of. Every one knows that pneumonia and consumption originate from a cold, and chronic catarrh, bronchitis, and all throat and lung trouble are aggravated and rendered more serious by each fresh attack. Do not risk your life or take chances when you have a cold. Chamberlain's Cough Remedy will cure it before these diseases develop. This remedy contains no opium, morphine or other harmful drug and has thirty years of reputation back of it, gained by its cures under every condition. For sale by Howell & Jones.

This remedy contains nothing injurious and mothers give it to their little ones with a feeling of perfect security. Sold by Howell & Jones.

GREEN WOOD.

We are all enjoying beautiful weather, and as far as I know everybody is enjoying good health, and I don't see why our correspondents don't have something of value to the readers of the Enterprise most every week from here. We have as good farmers here as anywhere, why don't some of them tell us the best way to farm different crops, and what will pay the best to raise? Something of that kind would benefit us all.

What is the matter with our school this year. Xmas is gone by; also New Years, and it seems that everything is dead around here except the dance. I do enjoy a good dance as

well as any of them, but we should not forget the little children. North, and south, east and west of us they are getting up socials or some kind of entertainment for the young children. Let us all wake up and do something and let us see if we can spend a pleasant evening at the school house listening to the little ones, and do all we can to help them.

DEAFNESS CANNOT BE CURED.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by

At 8:30 Wednesday evening at the Fisher home on Eight street, occurred the marriage of Miss Clara Fisher, youngest daughter of E. W. Fisher, and Ernest Rands of Oregon City. Promptly at the appointed hour, Mrs. Inez Wilson seated herself at the piano, and to the strains of a wedding march, the bridal party led by Doctor E. J. Thompson, approached the front parlor, where under a lovers' knot the ring ceremony of the Presbyterian church made the lovers man and wife. The bride leaning on the arm of her father, was very attractive in a white gown of net over taffeta. Her veil was caught in place by a handsome diamond pin, the gift of the groom. The matron of honor was Mrs. Clara Irvine-Hembree, of McMinnville, who was becomingly gowned in pink chiffon over taffeta. Mr. Carlton Harding, of Oregon City was best man. The dining room was prettily decorated with pink ribbons, smilax and pink carnations, the coffee table being especially attractive. An elaborate lunch was served by Misses Edna Osburn and Hazel Raber, the guests lingering about the table until a late hour. The bride is a daughter in a well known pioneer family, a graduate of the State College, and a young woman of worth. The groom is a civil engineer and a man of prominence in Clackamas county. TRAIN WRECK AVERTED.

The derailing and perhaps serious wrecking of the North-bound Eugene Local between Aurora and Barlow Monday morning was only averted by the timely warning that was given by a tramp.

Discovering a broken rail, presumably resulting from the passing of a heavy freight train, the tramp ran down the track and stopped the approaching local passenger train within a few feet of the damaged rail. The broken steel was the outer rail of the track and the place of the danger was in a curve of the track about midway between Barlow and Canby.

On account of the curve it would have been impossible for the engineer to have stopped his train in time to avoid running over the dangerous rail which would surely have caused a derailment.
