The Breath of Life.

It's a significant fact that the strongest animal of its size, the gorilla, also has the largest lungs. Powerful lungs means powerful creatures. How to keep the breathing organs right should be man's chiefest study. Like thousands of others, Mrs. Ora A. Stephens, of Port Williams, O., has learned how to do this. She writes: "Three bottles of Dr. King's New Discovery stopped my cough of two years and cured me of what my friends thought consumption. O, it's grand for throat and lung trouble." Guaranteed by Howell & Jones, druggists. Price 50c and \$1.00. Trial bottle free.

WILL INSTALL HOT AIR HEATING PLANT

School Board Contracts With Portland Firm for Improved System.

At an expense of \$1800, the Oregon City school board has decided to install at the Barclay building the W. G. McPherson hot-air heating system. A committee, consisting of Directors Harding, Caulfield and Albright was named at Monday night's meeting to enter into a contract with McPherson and have the system installed in time for the opening of the schools on the 24th inst.

The new system consists of two furnaces and an 80-foot fan and while the expense of installing the plant is some greater than that of the old wood-burners, it is believed that the difference in the cost will be more than made up in the item of fuel while the sanitary features are a great improvement over the old apparatus.

The fan will be operated by a water motor and the waste water will be used in the closets at the building. The plant both heats and ventilates the building and is guaranteed to satisfactorily serve the district for a period of five years.

Starving to Death.

Because her stomach was so weakened by useless drugging that she could not eat, Mrs. Mary H. Walters, of St. Clair St., Columbus, O., was literally starving to death. She writes: "My stomach was so weak from useless drugs that I could not eat, and my nerves so wrecked that I could not sleep; and not before I was given up to die was I induced to try Electric Bitters; with the wonderful result that improvement began at once, and a complete cure followed." Best health tonic on earth. 50c. Guaranteed by Howell & Jones, druggists.

CLACKAMAS SCHOOL NOTES.

Superintendent J. C. Zinser will go to Salem October 5 and 6, to attend a meeting of the county superintendents and principals of schools in the state that has been called to consider proposed changes in the present school laws and submit a report and recommendations to the next legislature.

The Marquam school has levied a special tax of 15 mills with which a new school house will be built.

Stafford district is completing an addition to its school building and will employ an additional teacher this year. Another teacher will be employed in the Stone school this year and a special meeting will soon be called in this district to provide the additional funds that the increased expense will require.

Nichols, a local merchant, for something to stop the pain. Baby's Ideas.

A director of one of the great transcontinental railroads was showing his 3-year-old daughter the pictures of a work of natural history. Pointing to a picture of a zebra, he asked the baby to tell him what it represented. Baby answered, "Colty." Pointing to a picture of a tiger in the same was, she answered, "Kitty." Then a lion, and she answered, "Doggie." Elated with her seeming quick perception, he turned to the picture of a chimpanzee and said, "Baby, what is this?" Baby answered, "Papa."—Woman's Journal.

MOLALLA WARMING TO ELECTRIC ROAD

Molalla, Sept. 12.—Our prospect for an electric railroad is very good. Everybody seems to have faith that it will be built this time. The route is a sensible one along water courses all the way. Of course no company can build a road without ground to run on—narrow valleys among the hills at certain points must form the very natural conditions, for the good of the enterprise that is about to take hold of South Clackamas—furnish the right of way. True we are all interested in the best possible grade if in places, it does run through meadows and gardens. Then many of us are overly interested, we so much want it to run near "our land." Then again, real estate has always been "out of sight per front foot," running and butting" up against the cross-roads in the town of Molalla. It might be the best for the future development of our town to move it out of the low ground a quarter to the West, East, South or North. West and South being the more natural route.

As a dressing for sores, bruises and burns, Chamberlain's Salve is all that can be desired. It is soothing and healing in its effect. It allays the pain of a burn almost instantly. Half of the neighbors have gone to the hop fields; hope they don't get wet.

Prune drying will begin next week. The crop will be a good yield.

Mr. C. T. Zinser and family picked seven 42-pound crates of blackberries from their one acre piece. Many more on the bushes. Pretty good for Mt. Scott for this time of the year. From one-half acres of strawberries he harvested 9102 pounds, over four tons.

Mr. Hanson expects to go to the Empire State this coming Saturday on account of his health.

Truths About Artificial Teeth

The great majority of dentists represent to their patients that a rubber plate with fourteen teeth set in a half circle is just as good as anything else for a set of artificial teeth.

Some make such representations knowing them to be false, others because they know no better.

The responsibility for this condition rests with the dental profession.

A great many people would not accept a rubber or celluloid plate if they only understood the superiority of a metal plate in cleanliness, healthfulness and durability.

We would like to talk with you about metal plates for artificial teeth.
