TIME TO SPRAY

49£7

SAN JOSE SCALE AND DEAD SPOT MOST EASILY REACHED AT THIS TIME.

Now is the time to commence spraying for San Jose scale, dead spot or fungus diseases of fruit and fruit From now until next spring trees. when the buds start is the best time, for while the trees are dormant the standard spray for this kind of work can be put on full strength without injury to the tree or next year's crop

of fruit. The "Oregon" spray-that is lime and sulphur spray-properly made and properly applied, is the standard winter spray and may be put on any time during the dormant season.

When the trees are dry, a half hour or less is sufficient for the spray months steady for all you need to care. If your spray is properly made and properly put on it will then do

I am asking you to spray now because from the experience we have everybody waits until spring to spray, then only those who own their own of their own to do the work will be able to get their work done satisfactorily, and even they sometimes find that weather conditions are such that they can do only very unsatisfactory

work. There is no question but that the San Jose scale can be easily killed now than next spring, for a great majority of them are young and have only a very light coating of the gummy substance over them which protects

much the worse for the tree. There are a great many other insect pests that are effectually put out said court has set Saturday, November of existence at the same time that you kill the San Jose scale, such as m., and the court room of said court oyster shell scale, and the branch as the time and place for the hearing form of wolly aphis, also fungus dis-

eases of all kinds. If you sprayed your trees last year and sprayed properly it will not be necessary for the fruit inspector to tell you to spray again this year, for you will thoroughly understand that to get results worth while, you must pray every year and spray every tree, and there is no danger of spra ing too much if you spray intelligent-

But there are a great many who did not spray properly last year, and who are damning the inspector, and fruit commissioners for what was their own fault, and if they will get ready to spray again, he will see that their work is properly done next time, and if they do it right he will guarantee results.

I found several people hauling wormy apples to market this summer who declared that they had sprayed their trees at a heavy expense, and that the spraying did not kill the worms. When asked what they sprayed with they answered, "lime and sulphur." Now lime and sulphur is the best spray in the world for fruit trees, as a general cleaning up spray and for killing San Jose scale, but it does not affect the codlin moth in the least, and of course you know by this time that "arsenate of lead" applied just about when the petals fall the first time, followed at the proper intervals during the summer is the only way to handle the codlin moth. Now for our shade trees in the city.

I hope that the people of Portland when they spray their fruit trees will attached to their property. I noticed during the summer and late fall that had become loathsome from the effect

I would also like to call the attenis dated the 28th day of October, 1907, are bubbling over with "hot air" and is made upon the application of about "roses, roses everywhere," that the attorney for the plaintiff herein, if they would spend or cause to be The date of the first publication of spent a few cents or at most a few are trying to sell they will be able to get a much better price for the property as we'll as do the public at large a favor which will be appreciated. I have also seen in a yard full of beautiful shrubbery and roses, an old fruit tree nearly dead from fungus and insect pests. Get rid of either the pests or both pests and trees, and save

your flowers and shrubbery. Spray early, for if we have fine and favorable weather now and during Oregon for the County of Multho- the winter we are sure to get the rain

in the spring. Spray now and avoid the possibility of a shortage of labor or material, and possibly a short season for spraying

Lastly don't be backward on calling on the State Board of Horticulture

entitled court and cause on or be- willing to help you and are doing the and answer, and which date is more that may be of interest to fruit grow-
