FRANK BUSCH

Three Blocks below the Court House, on Eleventh & Main Streets.

A Few Unheard of Bargains Still Left in All Departments.

OUR FARMERS' PAGE.

ENTERPRISE READERS ARE INVITED TO CONTRIBUTE AGRICULTURAL, HORTICULTURAL, LIVESTOCK, POULTRY, DAIRY OR "BIG CROP" ITEMS FOR THIS DEPARTMENT.

Care in Feeding.

There is a knack in the feeding of hens that must be learned by experience. The hens must be well fed and yet should always be a little hungry during the day. They are not to be at any time satisfied, but in the evening they may be fed all they will clean up readily. It is a long standing custom for poultrymen to feed hens

well provided the feeding of a mash may be discontinued, fed at intervals, or dropped from the bill of fare entirely.

Apple Crop Decreases.

The following figures are those of the United States Department of Agriculture, and show the decrease in the apple production of this country during the 12 years ending 1907:

Year	Barrels
1895	69,540,000
1896	69,979,000
1897	41,536,000
1898	28,570,000
1899	37,560,000
1900	47,960,000
1901	26,970,000
1902	47,625,000
1903	45,000,000
1904	45,300,000
1905	23,500,000
1906	36,130,000
1907	25,000,000

Formulas of Insecticides.

The Agricultural Experiment Station of the Washington State College has recommended the two formulas of insecticides below:

Arsenate of Lead—Arsenate of lead (putty), 1 pound; water, 40 gallons. The putty form of lead can be obtained on the market under the name of the Eagle, Rex or Swift's arsenate of lead, or Dispersant. Arsenate of lead is especially useful where there is much rain. It sticks well and does not scorch the leaves. Most orchardists use this for the codling moth in preference to Paris Green.

Sulphur-lime Wash—Sulphur, 1 lb.; good lime, 1 pound; water, 3 or 4 gallons. First slake the lime in the cooking vat. When saked, add the sulphur and enough extra water so that the mixture will stir easily. Keep it well stirred till boiling begins. Boil until the sulphur is completely dissolved, which usually takes from thirty minutes to an hour. Then add the requisite amount of water, and the mixture is ready to spray. It should be poured into the spraying tank through a strainer. It is advantageous to use a small amount of water at first, so that the mixture may be more thoroughly and quickly boiled.

VARIETY IN USE OF APPLES.

May Be Served in More Ways Than Other Fruit.

While the apple in its natural state possesses its greatest value, its use in other ways must be encouraged. To make it a popular food, there must be variety in its preparation. Cooking or canning apples do not detract materially from their value and serve to increase their use. In fact, most people would tire of the apple if served three times a day in its natural state. It is the various ways it may be served which add to the value of the apple as a food. An apple pie might much better be eaten than some of the rich pastry now so common in the American home. The baked apple is one

a mash once a day, and this may be fed morning and evening to convenience. Where meat and green feed are of the best forms in which the fruit can be served, second to the natural apple itself. Apple cider is more healthful than many of the beverages which take the place of it now-a-days. Apple sauce and apple butter are splendid foods and possess all the values of the apple itself and serve to make the use of the fruit more common.

Too often, however, the culls and poorer grades of apples are used for these purposes, with some times more injury than benefit. Many people will eat an apple cooked or baked which they would not eat in its first condition. This should be discouraged, for cooking or baking apples does not always remove germs that may be in them. Demand only good apples, and use them for all purposes.

What plant we in the apple tree? Sweets for a hundred flowering springs To lead the May wind's restless wings. When from the orchard rows it pours Its fragrance through the open doors. A world of blossoms for the bee, Flowers for the sick girl's silent room, For the glad infant, sprigs of bloom, We paint the apple tree.—Bryant.

Rats and Poultry.

The most exasperating and one of the hardest enemies the poultryman has to combat is rats. At times they become very bold and not only attack the chickens at night, but venture forth in broad daylight. Several methods have been tried and some are very successful. Poisons, traps and dogs are the most effective, but each has its drawbacks.

To poison is probably one of the most effective methods in killing the rodents, but care has to be exercised when placing it out as other animals are liable to get it. A few grains of strychnine placed on a piece of toasted cheese or bread is one of the best. By placing it in the middle of a small drain the danger of other animals getting it may be avoided. Barium carbonate of barytes, mixed one part to five parts of meal and slightly moistened, is one of the most effective methods of destroying them. It has the additional advantage of not being poisonous to animals, except to those for which it is intended. The rats upon eating the mixture will seek water and drink greedily. They will die almost immediately, and their carcasses may be removed and buried. This overcomes the objections to most poisons, that is, the rodents dying in their holes and causing disagreeable odors. Where traps can be used without danger to other animals they are effective in getting rid of the rats. Common wire traps are very good, but the ordinary trigger and spring trap is one of the best. Dogs, where they can be used without injury to the fowls, will be found valuable allies to the poultry keeper.

After the chickens and dog have become used to each other his kennel, if put close to the poultry house, will often serve as sufficient warning to these unwelcome visitors.—Arkansas Experiment Station.

Kodol will, without doubt, make your stomach strong and will almost instantly relieve you of all the symptoms of indigestion. Get a bottle of it today. It is sold here by Howell & Jones.

TWO DIVORCES GRANTED.

Son of Late Senator Mitchell and Mrs. Lynd of Willamette are Free.

Hiram E. Mitchell, a son of the late United States Senator Mitchell, and formerly an officer in the United States army, was last Saturday granted a decree of divorce from Minette Mitchell, to whom he was married in New York City, April 13, 1904. He charges her with deserting him in the same city, August 19, 1905, and testified that she told him she was going on the stage and that she had not seen him since that time. Geo. C. Brownell appeared as attorney for Mr. Mitchell.

Mrs. Nettie C. Lynd has been granted a decree of divorce from her husband, W. A. Lynd, a well known resident of Willamette to whom she was married January 7, 1885, at Billings, Mo. Mrs. Lynd charged that her husband failed to provide for his family and that he cursed and swore at her and struck her. She was given the custody of their daughter, Rosa, aged 16 years, while the care of the other two children, Roy, aged 13 years, and Elmer, aged 14 years, was given to the father. John W. Loder was attorney for Mrs. Lynd, and Lynd was represented by Attorney George C. Brownell.

JOHN WALLACE BOUND OVER.

Watch Thief is Held to Circuit Court by Justice Samson.

Justice of the Peace Samson has made an order binding John Wallace over to the Circuit Court and in default of \$250 bail, Wallace has been committed to the county jail. Wallace was arrested at the Depot saloon last Thursday night on complaint of Charles Wolf, who accused him of stealing an Elgin watch and chain, valued at \$17. Wolf is a farmer, living between Clackamas and Milwaukie on a ten acre tract. He states that August 8 last, Wallace came to his house and asked to be allowed to work for his board and that he was taken in and fed for two days, but made no pretense at working. On the second day, which was Sunday, Wolf drove to the railway station to say farewell to some friends and during his absence Wallace secured the watch and chain and went to Portland. Wallace has been indicted on a charge of larceny from a dwelling.

Last of a Large Family. W. H. Woodruff and sister, Mrs. E. W. Oliver, of Elwood, expect to start for San Bernardino County, California, next week, for an extended visit with their brother. These two brothers and sister are the last of a large family, and have not all been together at the same time in 60 years.

IT'S YOUR KIDNEYS.

Don't Mistake the Cause of Your Troubles—An Oregon City Citizen Shows How to Cure Them.

Many people never suspect their kidneys. If suffering from a lame, weak or aching back they think that it is only a muscular weakness; when urinary trouble sets in they think it will soon correct itself. And so it is with all the other symptoms of kidney disorders. That is just where the danger lies. You must cure these troubles or they may lead to diabetes, or Bright's disease. The best remedy

to use is Doan's Kidney Pills. It cures all ills which are caused by weak or diseased kidneys. Oregon City people testify to permanent cures.

John Vigellus, barber, of 413 Main St., and living at the corner of Fourth and Washington Sts., Oregon City, Or., says: "Standing in a stooped position for hours at a time, as is necessary in my business, began to affect my kidneys, and often my back would almost give out on account of the weakness and persistent dull aching. A friend recommended Doan's Kidney Pills, so I went to Huntley Bros' drug store and procured a supply. I found in a short time that they were doing me good. They relieved the aching pains and strengthened my kidneys and back wonderfully. That was some time ago and the continued relief has been lasting. A little over a month ago we began giving Doan's Kidney Pills to our child, who has a tendency to weak kidneys, and the results have been gratifying in every way. Doan's Kidney Pills are a remedy deserving of the highest praise."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

COUNTY COURT

Be it remembered, that at a regu-amas County, held in the Court House in Oregon City, for the purpose of transacted business in AUG., the same being the time fixed by law for holding a regular term of said court, present Hon. Grant B. Dimick, County Judge, presiding; T. B. Killin and W. H. Mattson, commissioners, when the following proceedings were had, to-wit:

Portland Business College

"THE SCHOOL OF QUALITY" Tenth and Morrison, Portland, Oregon A. P. Armstrong, LL.B., Principal. We occupy two floors 65 by 100 feet, have a \$20,000 equipment, employ a large faculty, give individual instruction, receive more calls for office help than we can meet. Our school admittedly leads all others in quality of instruction. It pays to attend such an institution. **Said a Business Man:** "Keep hammering away everlastingly on thorough work. It will win out in the end." **Said an Educator:** "The quality of instruction given in your school makes it the standard of its kind in the Northwest." **Open all the year.** Students admitted at any time. Catalogue free. References: Any bank, any newspaper, any business man in Portland.
