MARKETS

RAIN DOES FARMERS GOOD.

Eggs Are Still Scarce and Potato Market is Not Active.

The farmers of the county have all been busily engaged in sowing their grain, although the rain of the last few days has been a hindrance. The weather has been just what the farmers have wanted. The early frost has done some damage to the late vegetables, but potatoes and other hardy vegetables suffered very little.

The potato market is not active at present. The growers are offering freely, but decline to sell for the prices that some of the buyers are paying.

The grape season is a thing of the past, and very few are found in the markets. Apples are coming into the market quite freely, and are of good quality. The King and others are bringing a price of 75 cents per box and upwards, according to the grade.

Eggs are still scarce, and are retelling at 40 cents per dozen. The demand for Eastern eggs in the local market is not great, and very few are being shipped in.

Turnips and parsnips are among the late vegetables that are now being brought to the market.

Wheat has gone from 90 to 95 cents per bushel, gray oats from 27 to 31. The price of hay remains the same as last week.

Clackamas County live stock has taken an advance within the last few days. There has been a drop in the poultry market within the last week, and the average price that is being received is 10 cents per pound. With the Thanksgiving coming on turkeys will be soon in the markets, the price for these has not yet been decided upon by the dealers.
